To label inside a bar chart.

Refer the dataset: African Mobile Data.xlsx

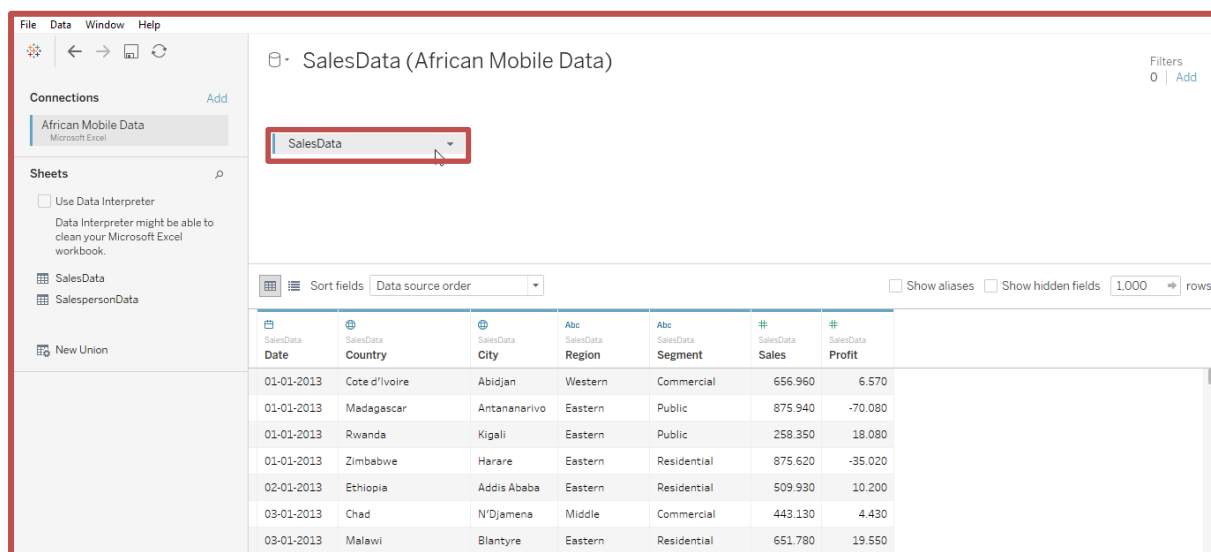

Demo VIII Solution

We shall consider African mobile data.

Step 1: Click on “Excel file” → Select “African mobile data” → Open

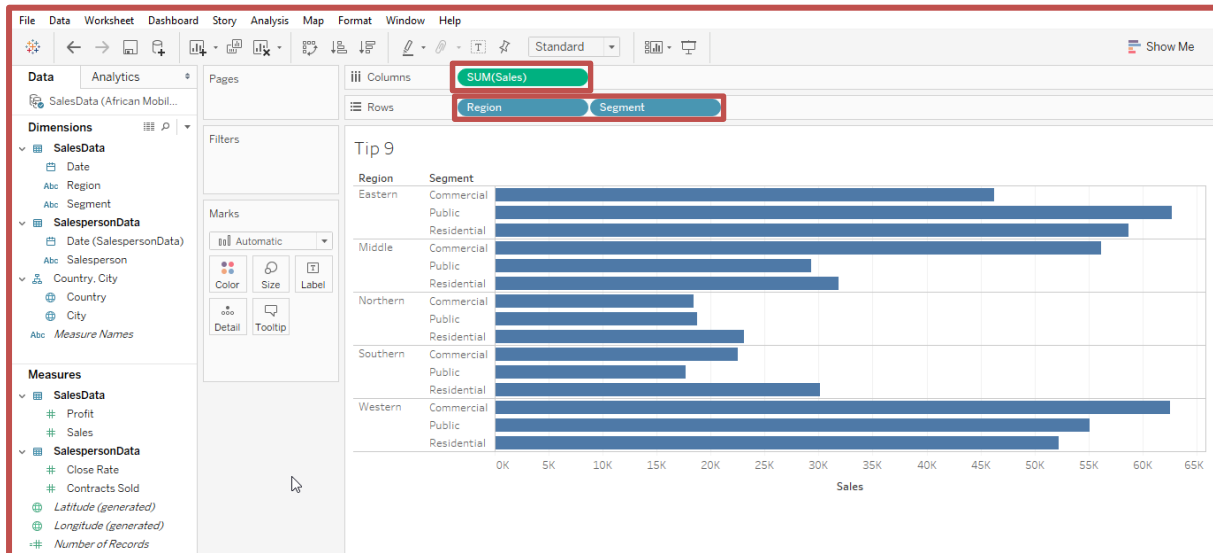

Step 2: Drag and drop the sheets that is “African mobile data” sheet on flow pane, select sales data and Click on sheet.

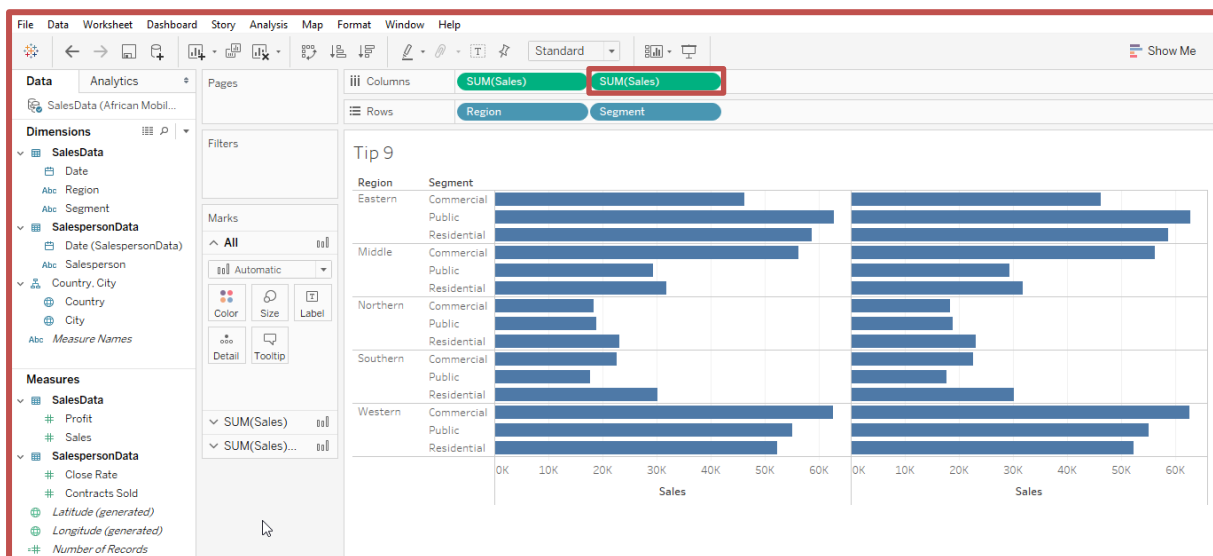

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.

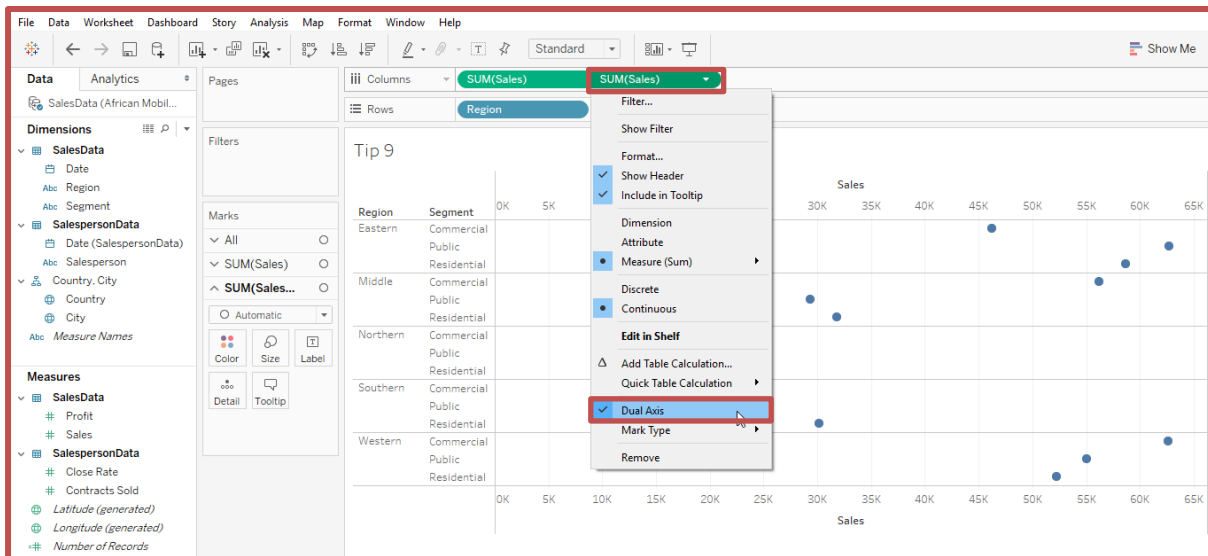

- Sales to columns
- Region to rows
- Segment to rows

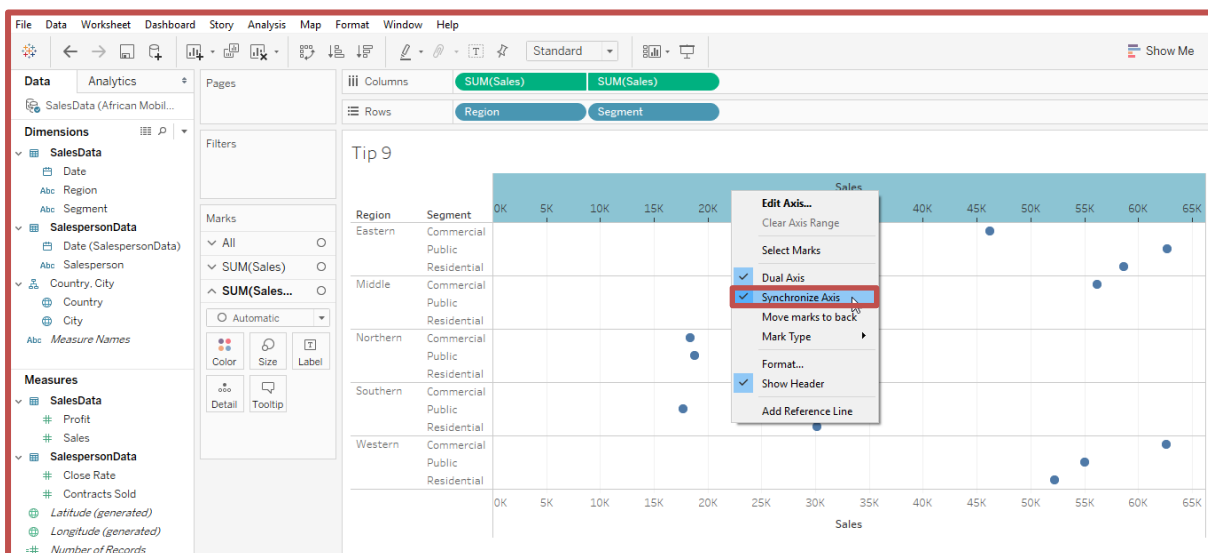

Step 4: Ctrl+right click to duplicate the sales pane to columns.

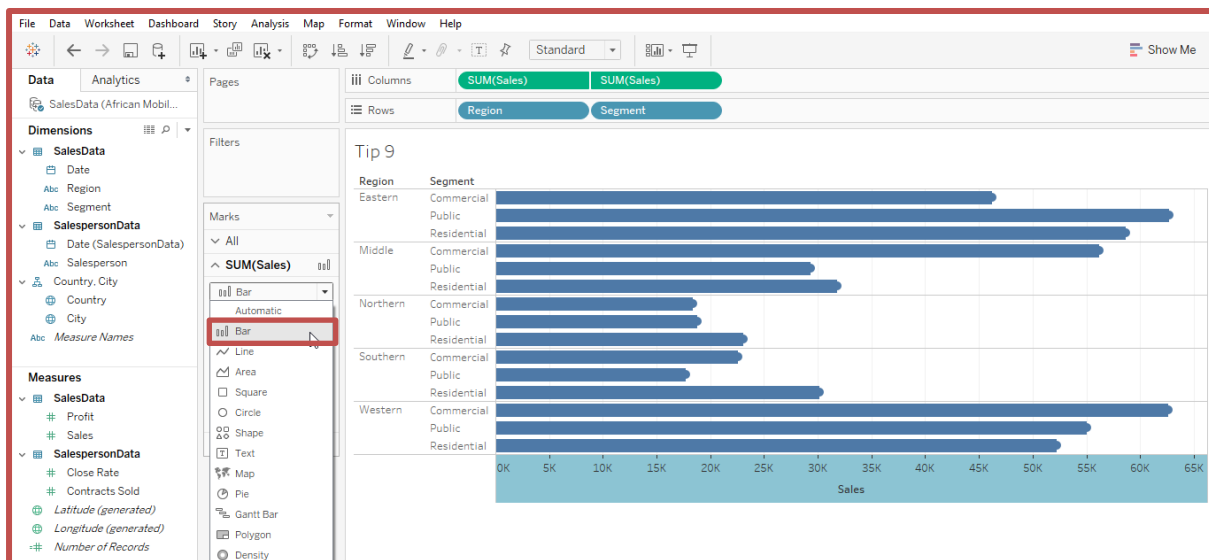

Step 5: Click the dropdown of sales (second) and select dual axis.

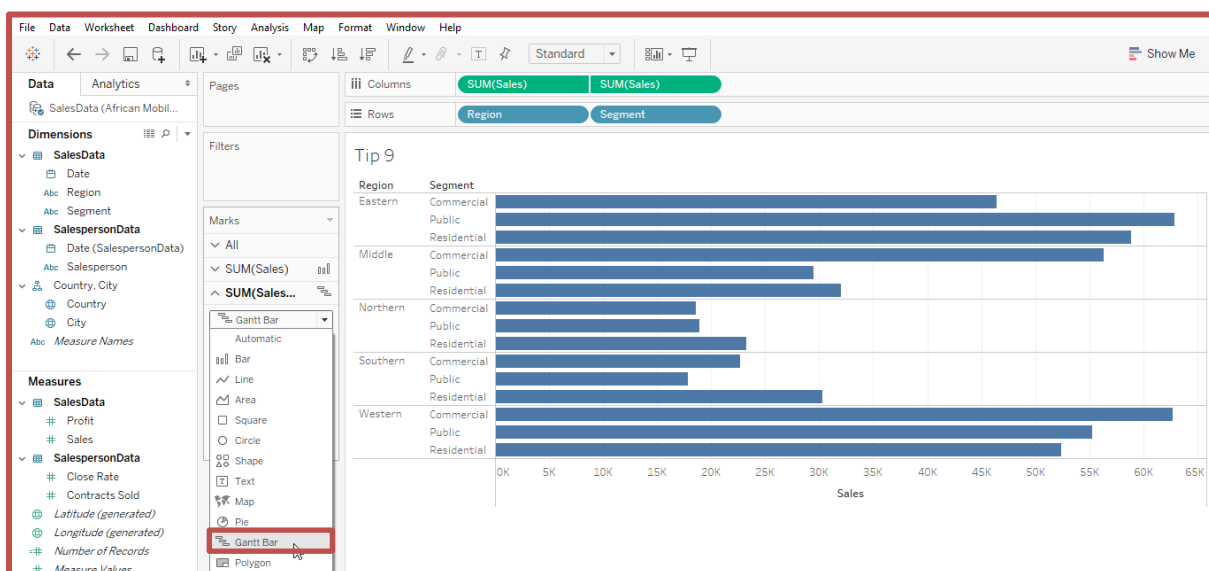

Step 6: Click on one of axis to synchronize it.

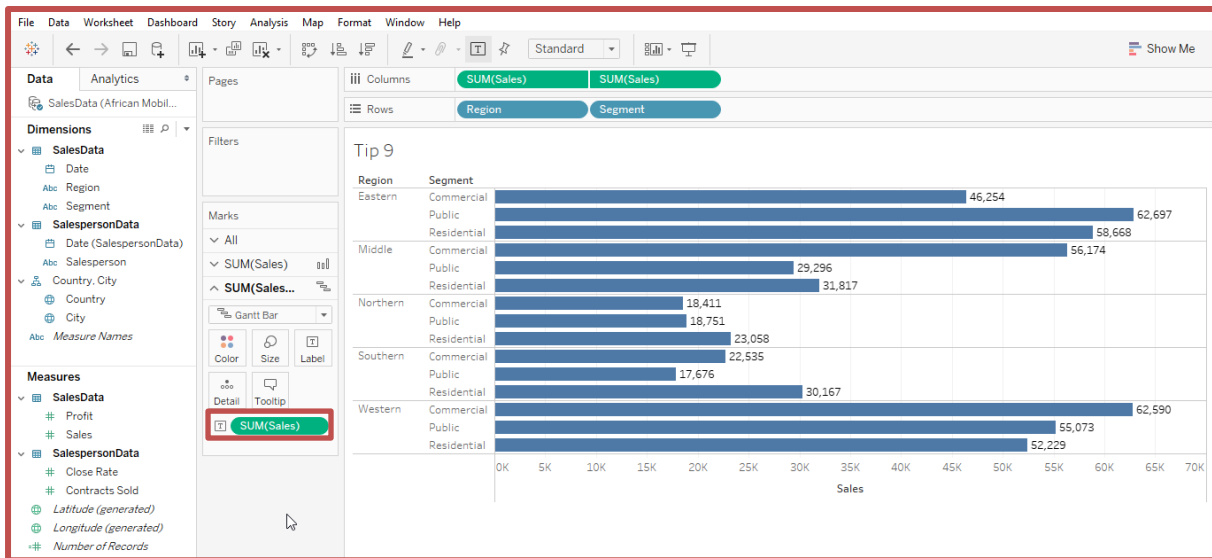

Step 7: Change the mark type to bar from marks shelf of sales (first).

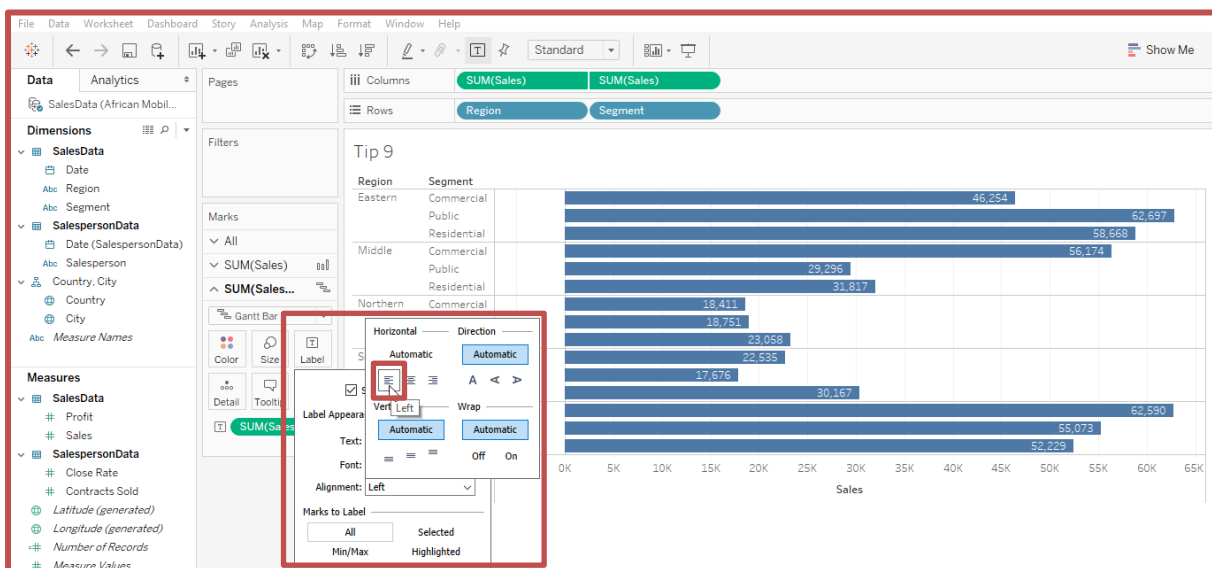

Step 8: Change the mark type to Gantt from marks shelf of sales (second).

Step 9: Add sales to label of Gantt bar pane in marks shelf.

Step 10: Edit the alignment in the tool tip to label it inside the bar chart.

Now, we have the required view.
