Demo VI

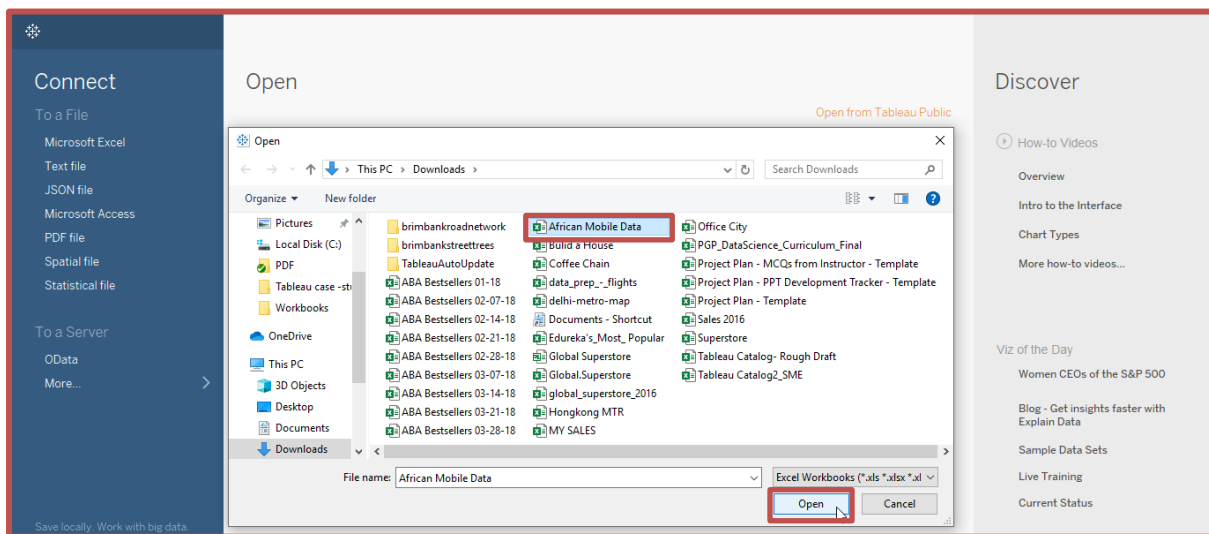

To build a multicolor area chart.

Refer the dataset: African Mobile Data.xlsx

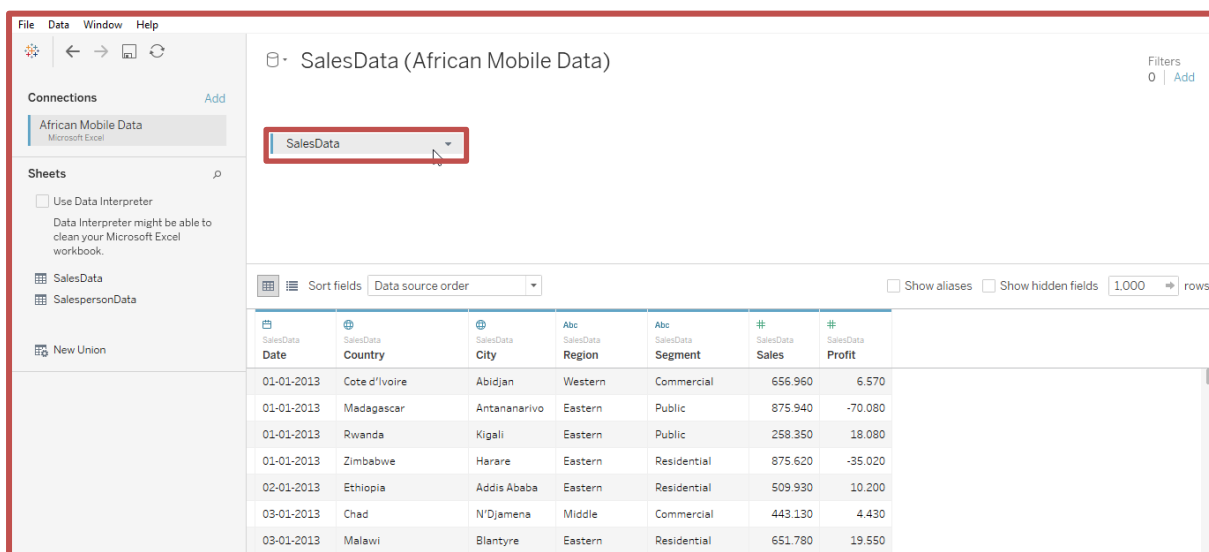

Demo VI Solution

We shall consider African mobile data.

Step 1: Click on “Excel file” → Select “African mobile data” → Open

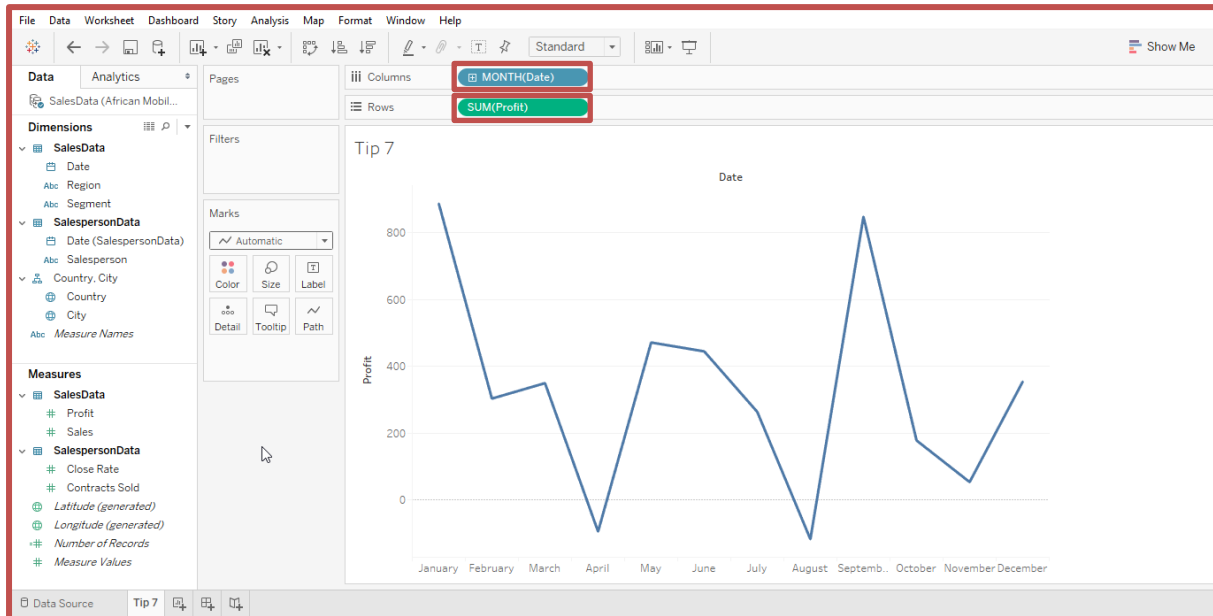

Step 2: Drag and drop the sheets that is “African mobile data” sheet on flow pane, select sales data and click on sheet(and rename it).

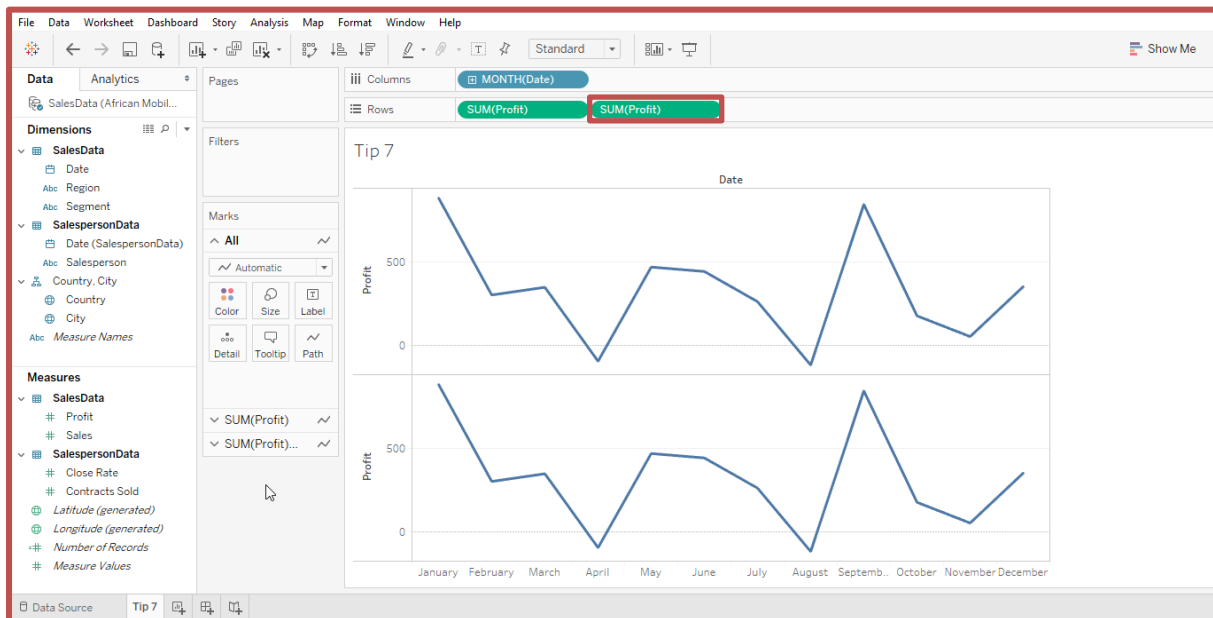

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.

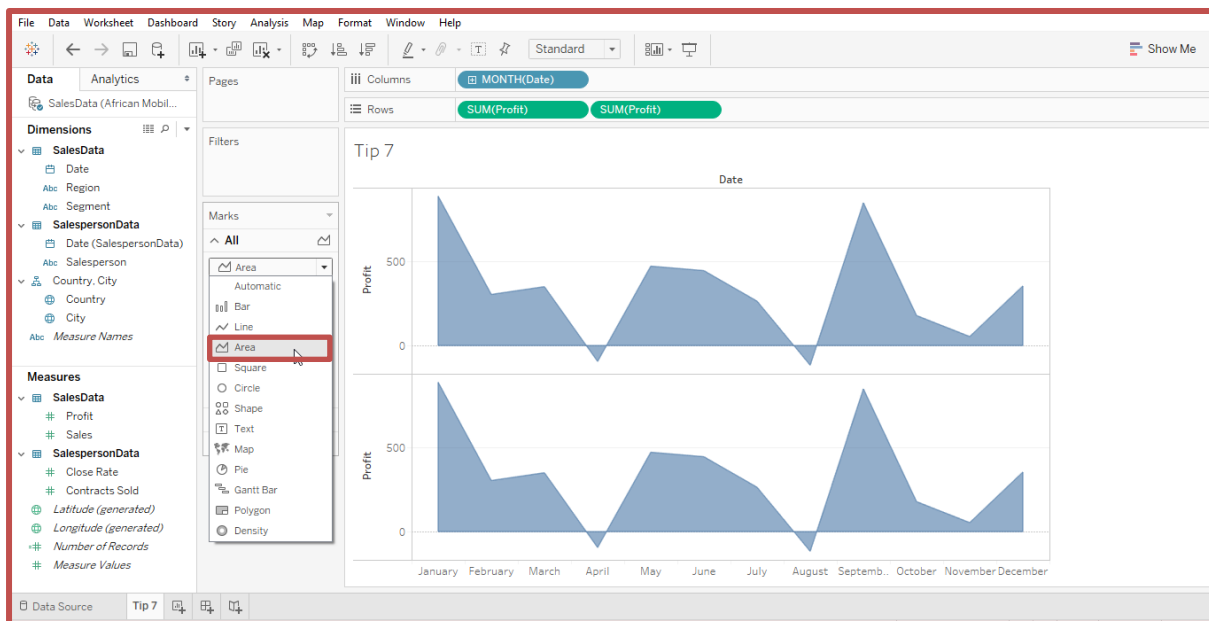

- Month (date) to columns
- Profit to rows

Step 4: Duplicate profit pill to rows.

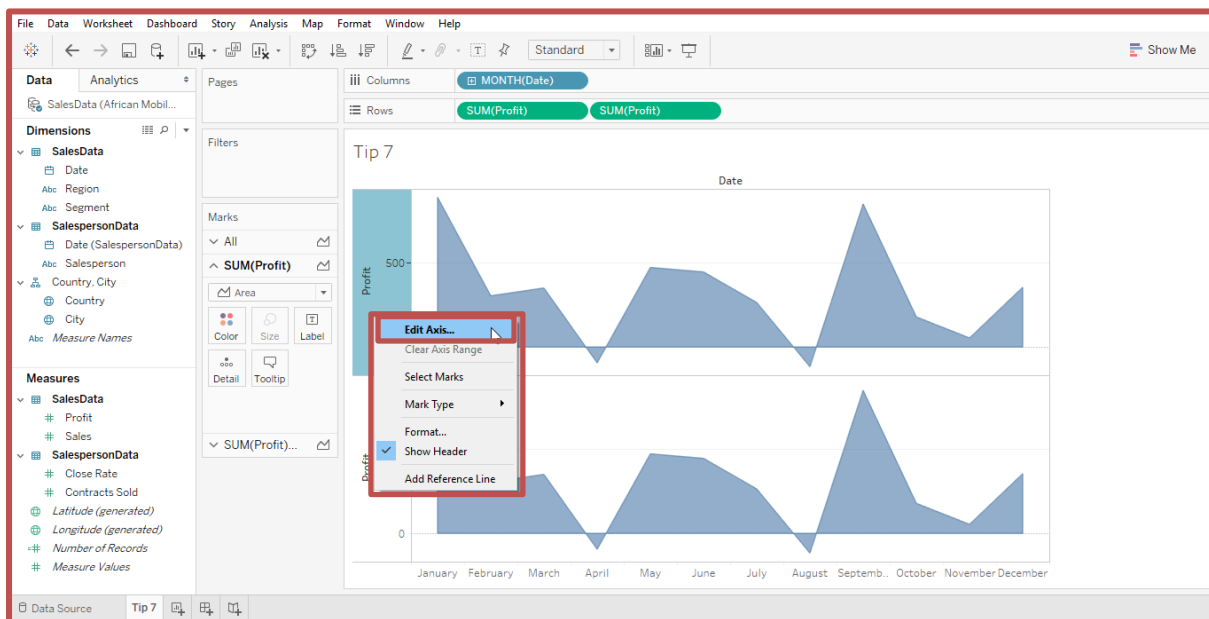

Change mark type to area from marks card shelf

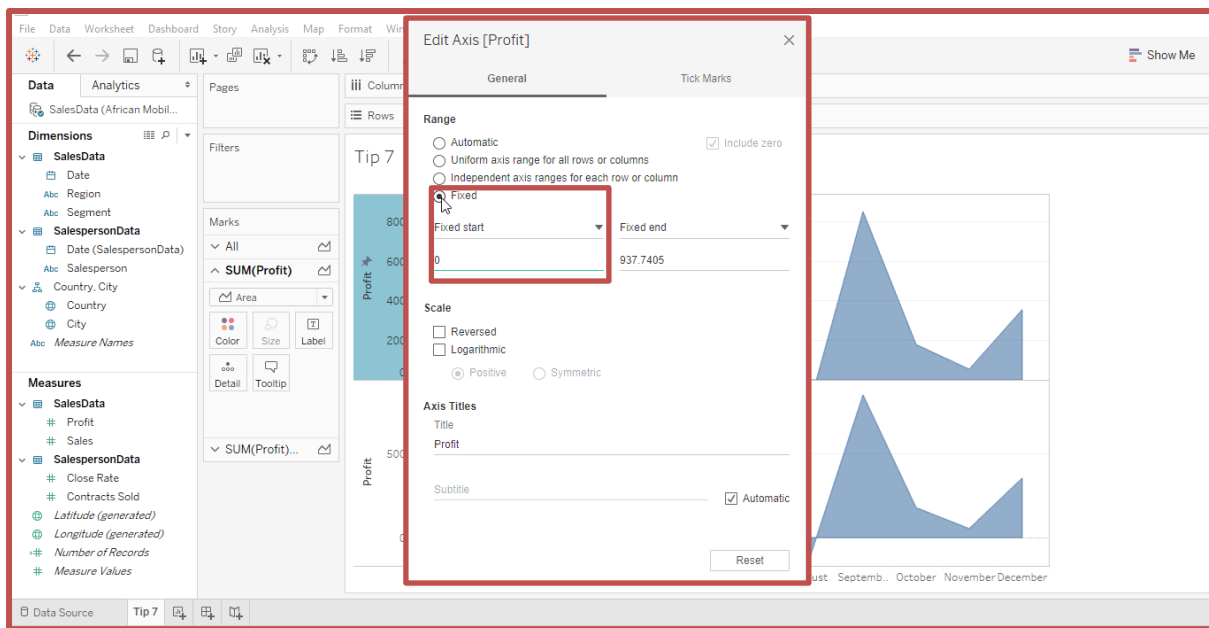

Edit the axis of profit pane (first) as they display only positive axis.

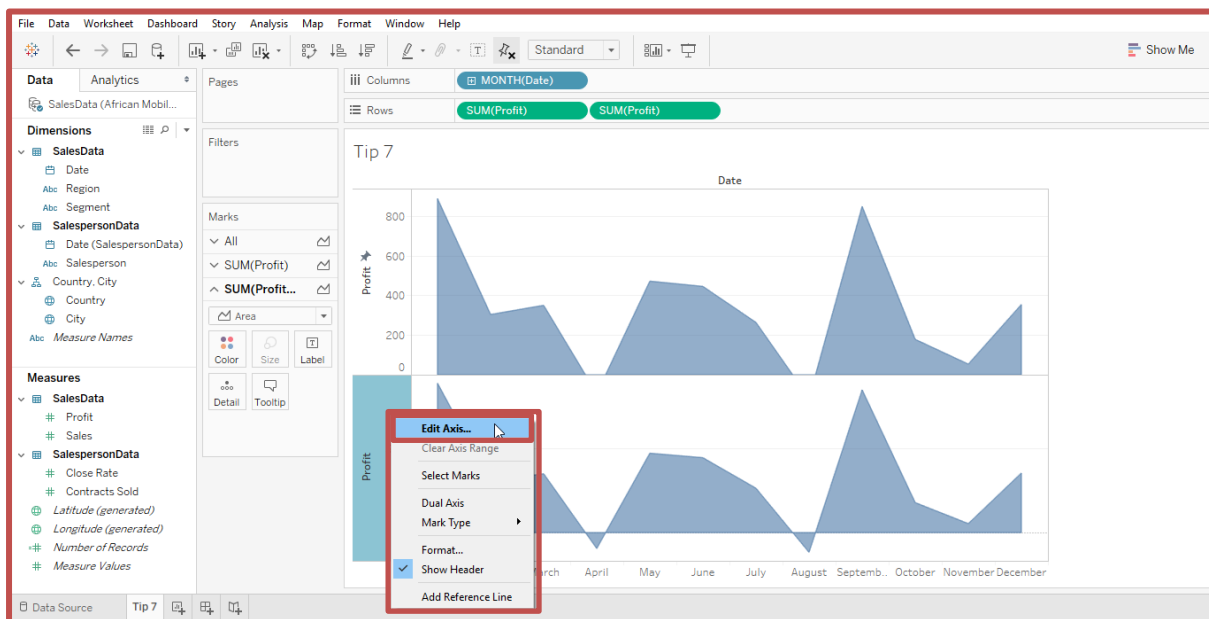

Step 5: To edit the axis right click on profit axis and select edit axis.

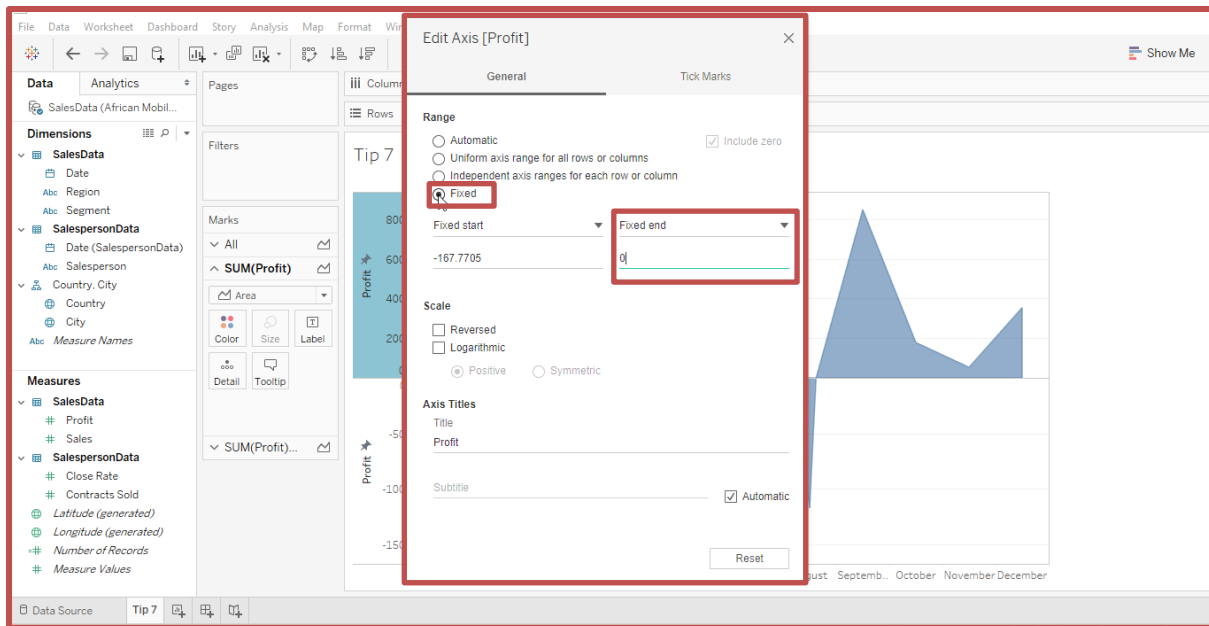

Step 6: Now, check the fixed axis box and change fix start to 0.

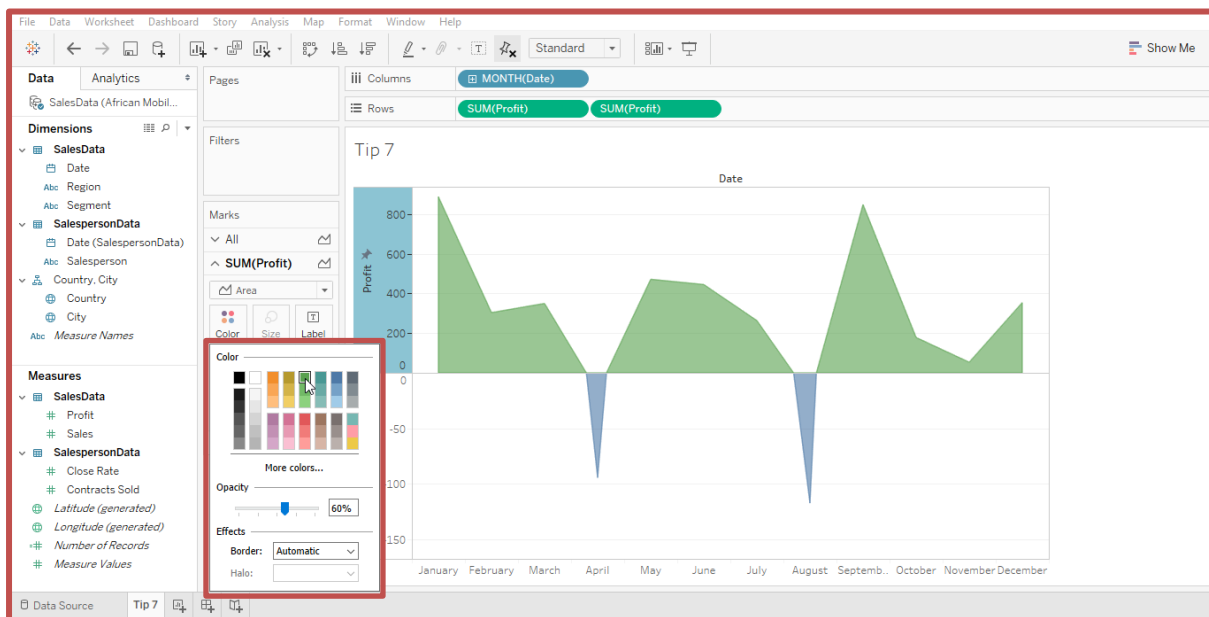

Step 7: Repeat the same for another profit pane (second) as well.

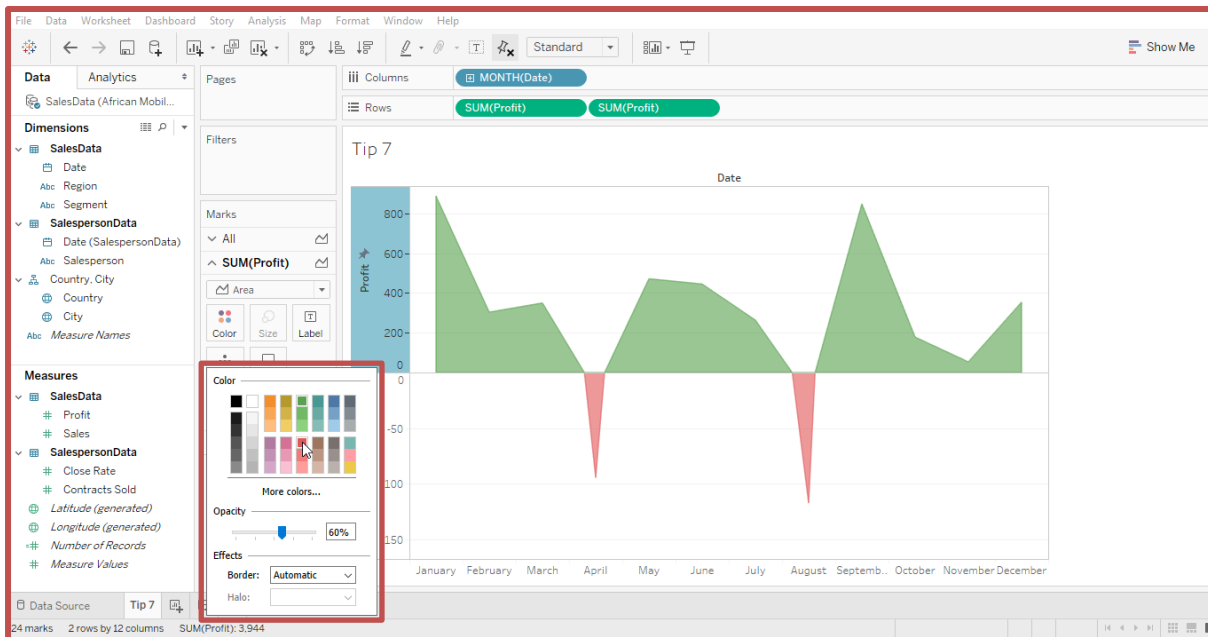

Step 8: Now, check the fixed axis box and change fix end to 0.

Step 9: Now, edit colors to have multicolor chart.

Step 10: Similarly edit the color of second profit pane as well.

We have the multicolor chart.
