Demo I

Using “African Mobile data.xlsx” dataset, filter out the required dimensions without using the filter shelf.

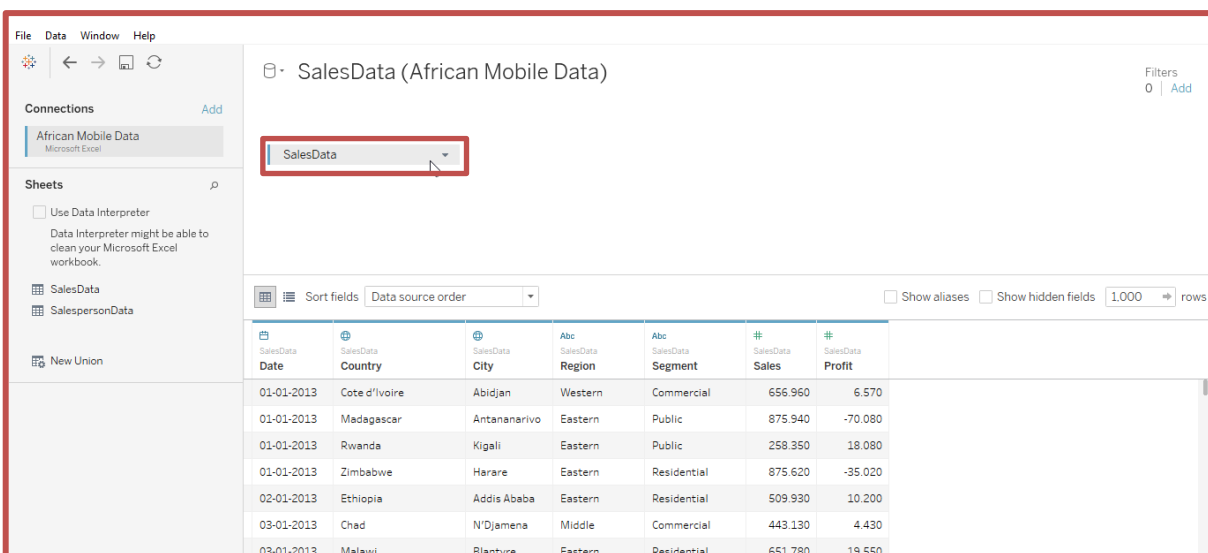

Demo I Solution

We shall take up African mobile sales data set in order visualize this.

Step 1: Click on “Excel file” → Select “African mobile data” → Open

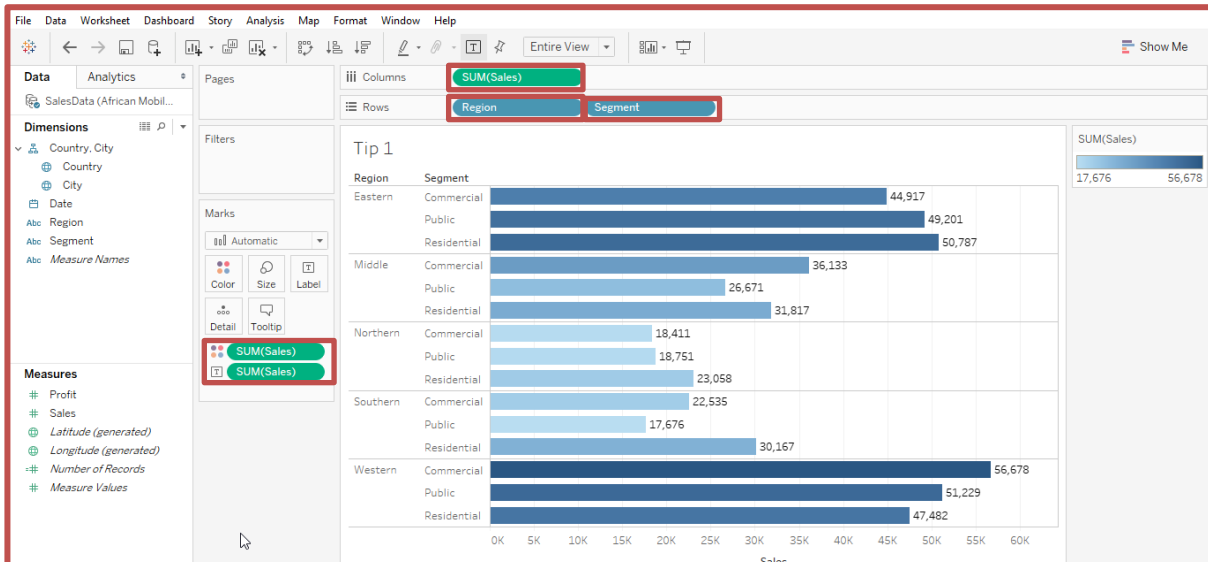

Step 2: Drag and drop the sheets that is “African mobile data” sheet on flow pane, select sales data and click on sheet.

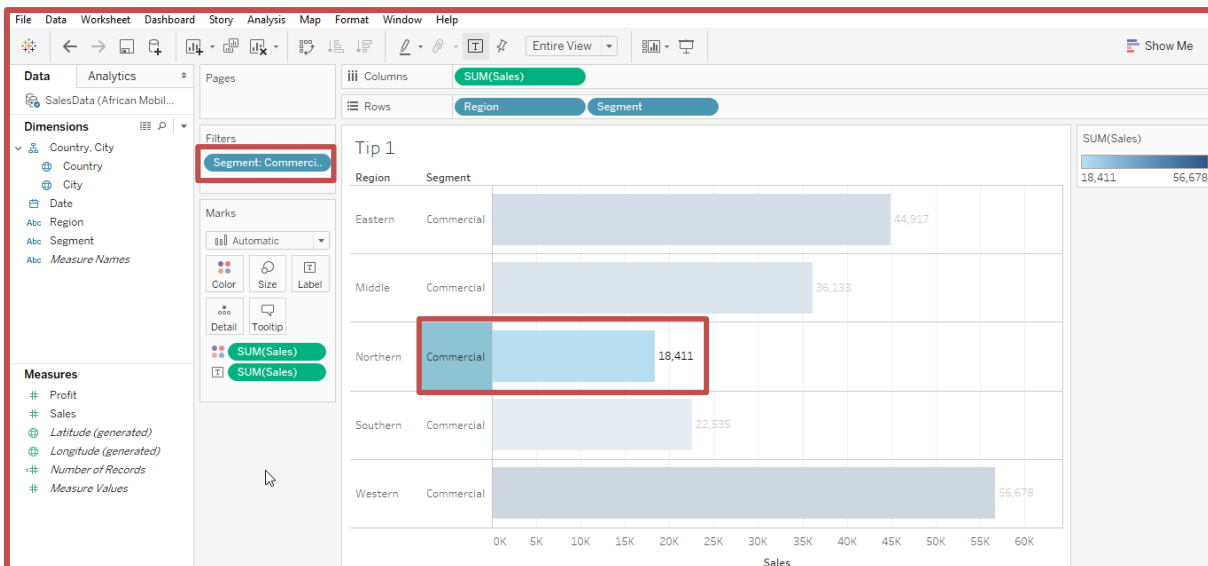

Go to sheet and rename the sheet to “Tip 1”

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.

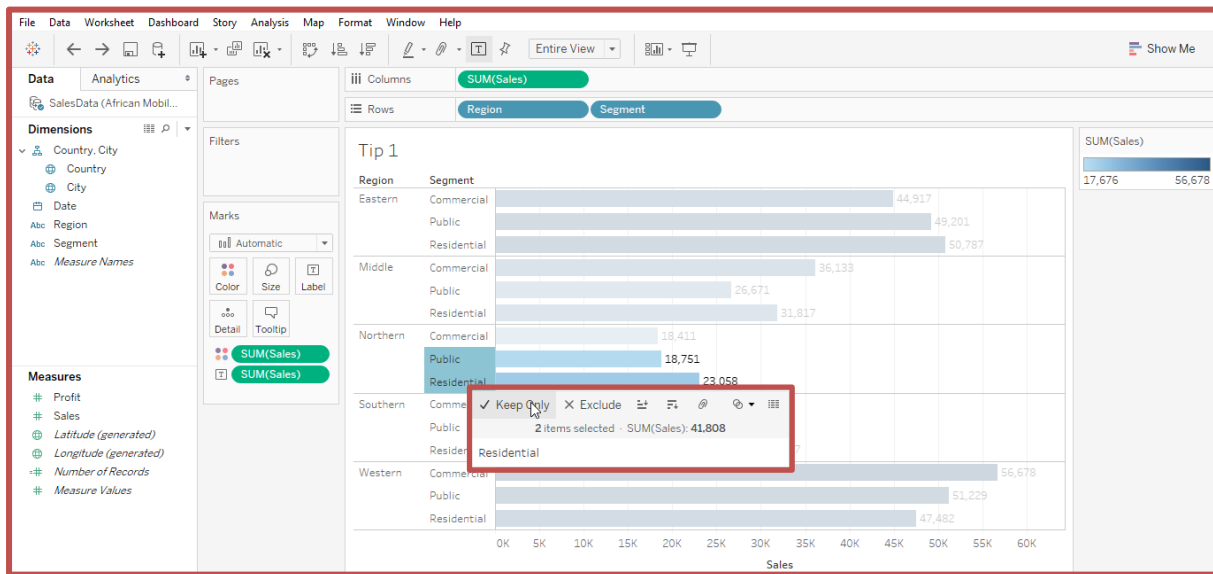

- Sales to columns
- Region and segments to rows
- Profit to color and label pane in the marks shelf

Step 4: Now, just double click on the segment which must be filtered, and it's done even without adding the segment to filter shelf.

Step 5: If you must filter multiple dimensions, you just have to ctrl+click the segments you must filter and select Keep Only.

Now you can visualize the sales of selected segments.
