Demo IV

Using “Edureka’s_Most_Popular.xlsx” dataset, create a visualization to find out the bestselling course.

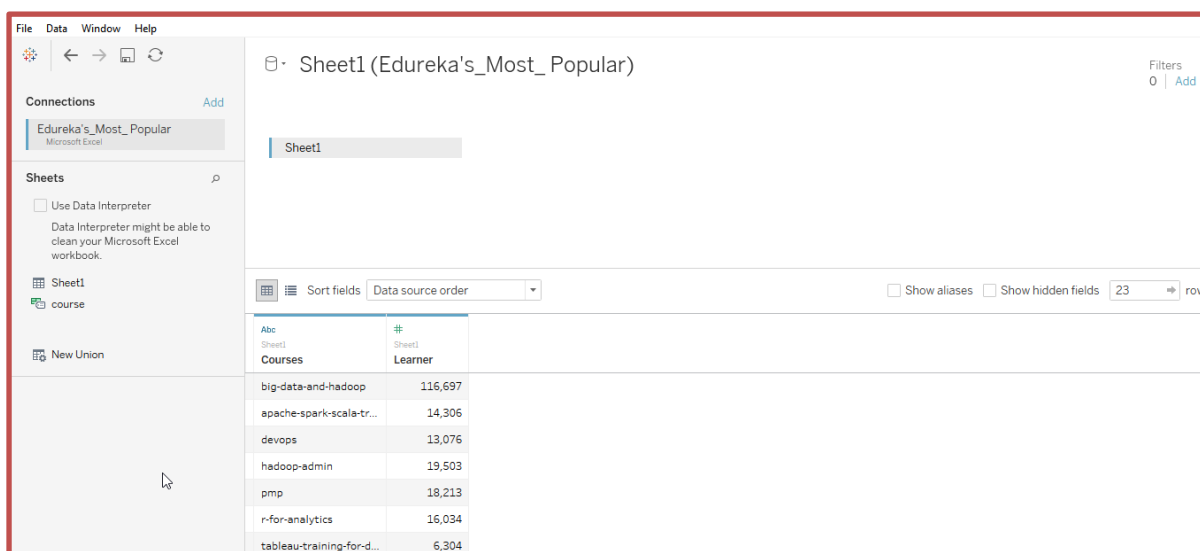

Demo IV Solution

In order to solve this query, build a simple cloud chart to visualize the bestselling course based on learners.

Step 1: Click on “Excel file” → Select “Edureka’s most popular” → Open

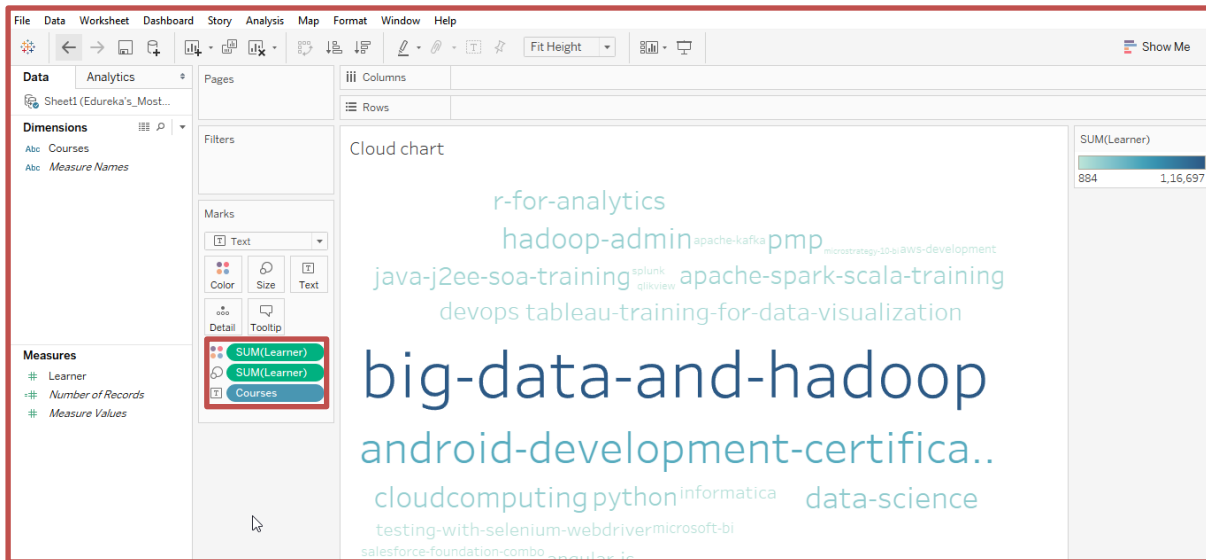

Step 2: Drag and drop the sheets that is “Edureka’s most popular” sheet on flow pane. Click on sheet.

Go to sheet and rename the sheet to “Cloud chart”

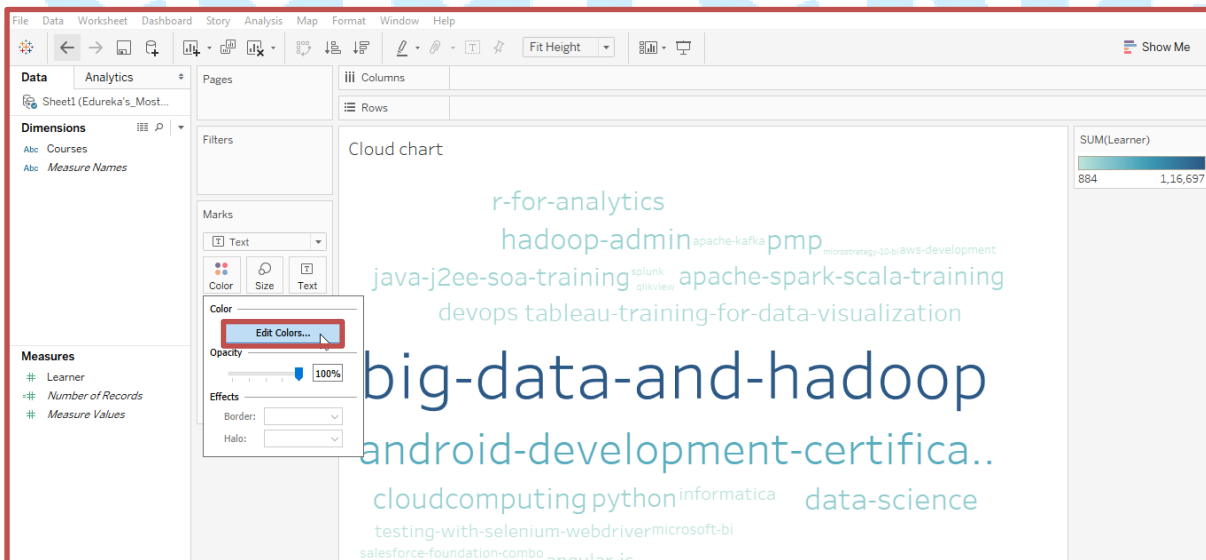

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.

- Courses to text pane in marks card shelf.
- Learner to color pane in marks card shelf.
- Learner to size shelf in marks card shelf.

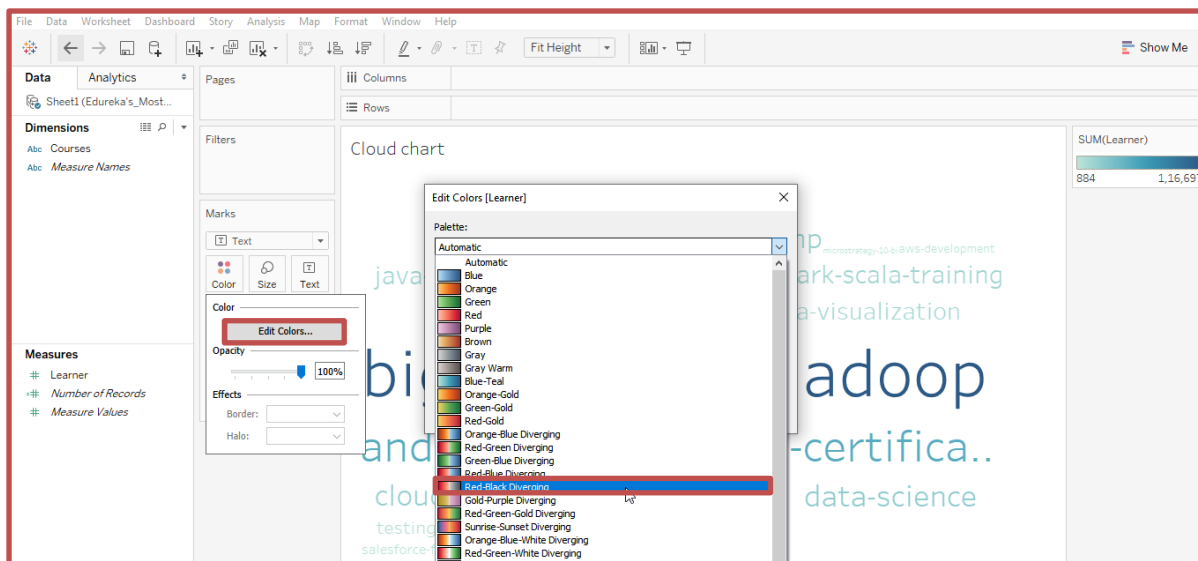

Step 4: Edit color to have an attractive visualization.

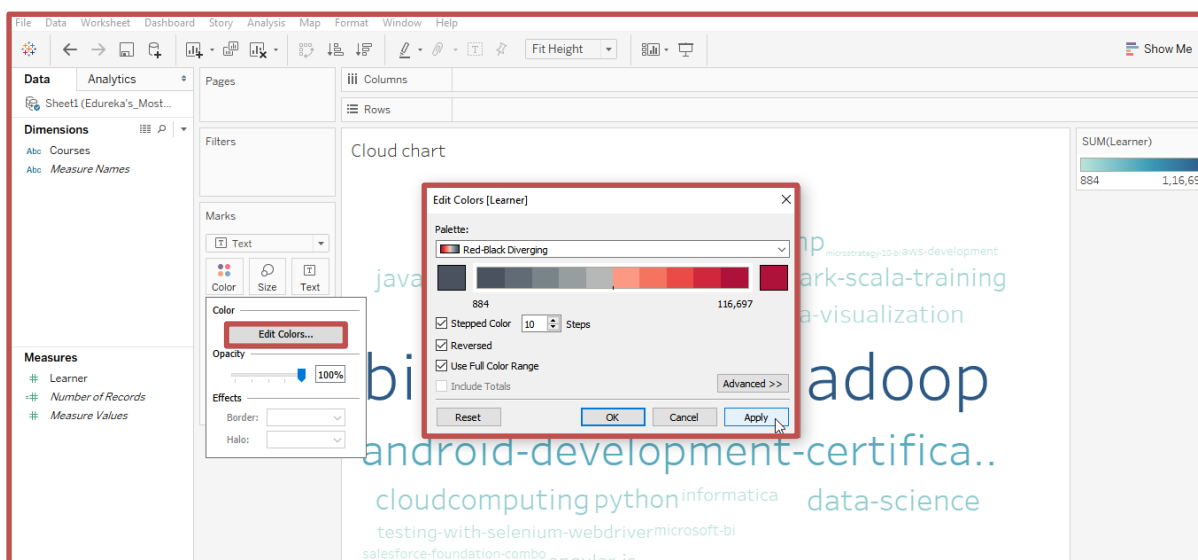

To edit color, click on color pane in the mark shelf and select edit color.

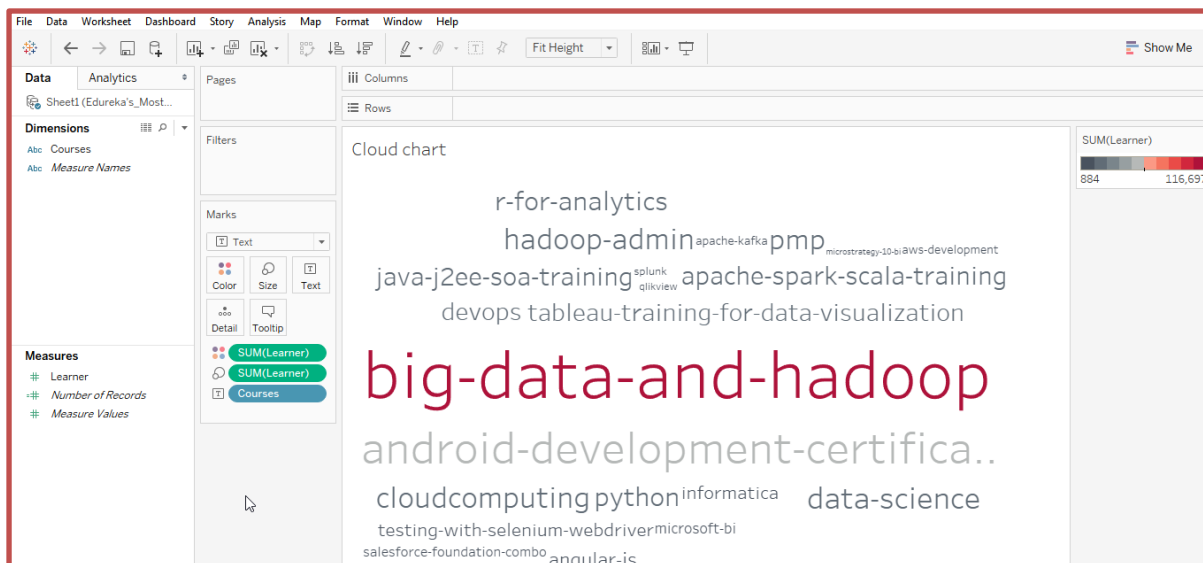

Step 5: Click the drop down of palette to choose the color of your choice.

Step 6: After selecting the color, you can even change the step color to your desired number and mark reversed and use full color range respectively. Then click ok.

We have the required visualization

We can observe that big-data-and-Hadoop is the most selling course.
