Demo I

Demonstrate Quick Table Calculation in Tableau.

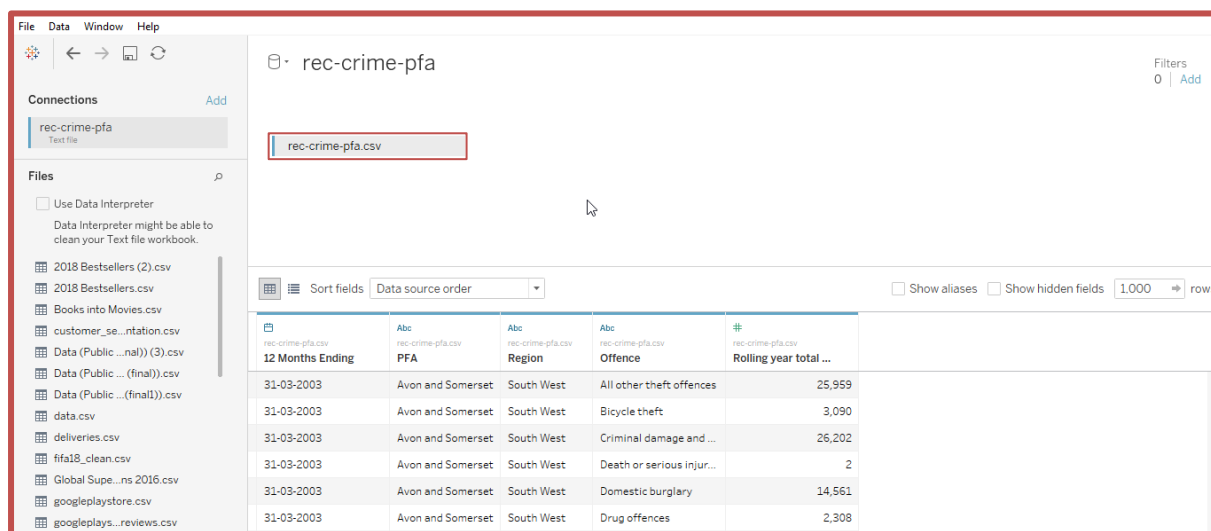

(Refer to the dataset: rec-crime-pfa.csv)

Demo I – Solution

Step 1: Click on the “Text file” → Select “rec-crime-pfa.csv” → Open

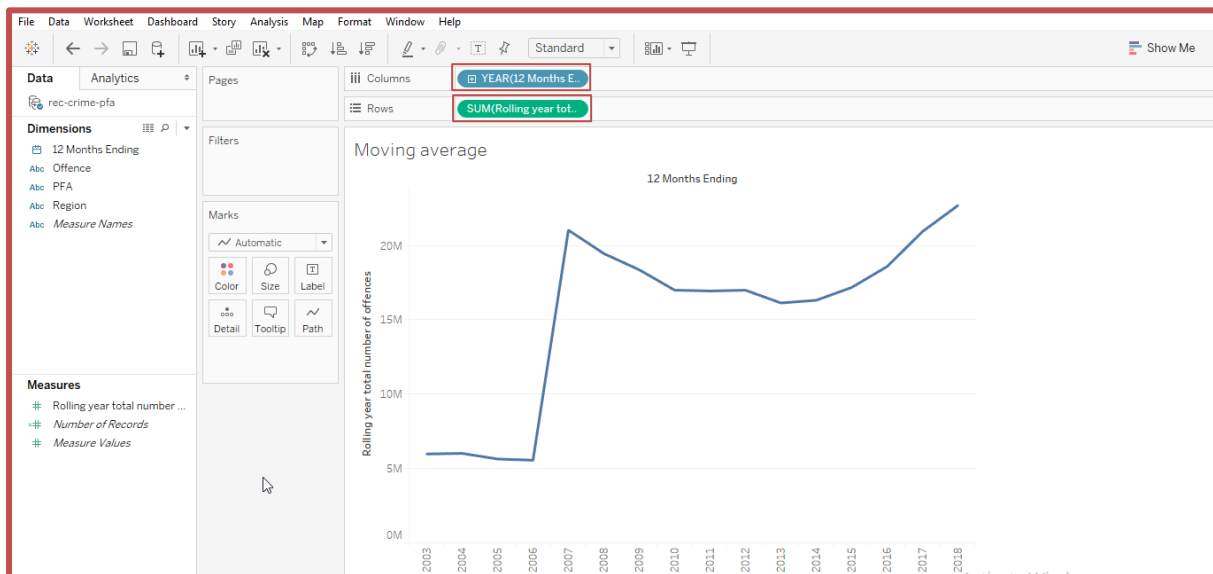

Step 2: Drag and drop “rec-crime-pfa” data on to the pane and click on the Sheet tab.

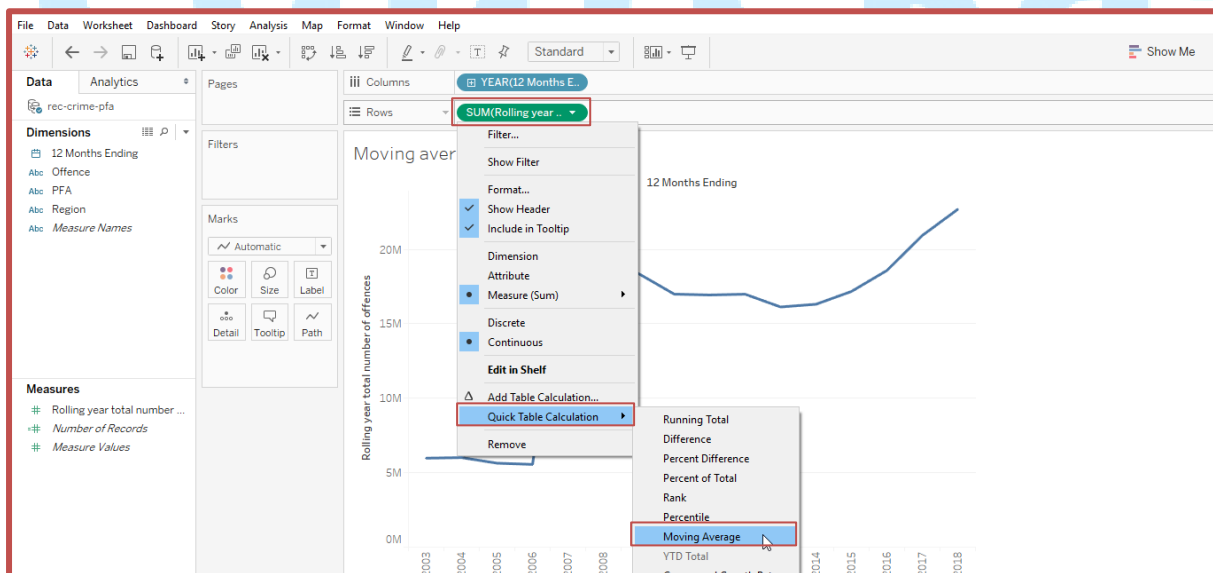

Step 3: Rename the sheet as “Moving Average”. Drag and drop the required fields from Dimensions and Measures on to the Columns and Rows shelf.

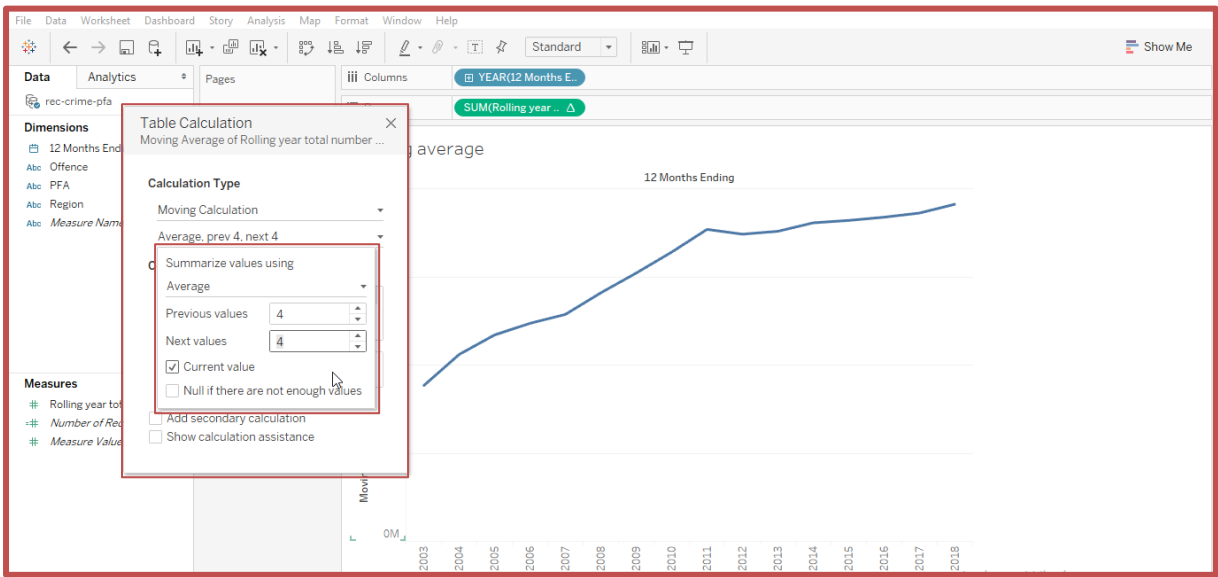

1. “Year” field on to the Columns shelf.
2. “Rolling year total number of offences” field on to the Rows shelf.

Step 4: Click on the “Rolling year” field in the Rows shelf and select “Quick Table Calculation -> Moving Average” option from the drop-down menu.

Step 5: Edit the Table Calculation.

Step 5: Observe the desired output.
