## Demo V

Using Supermarket dataset, build a report to categorize the quantities of products based on Gender.

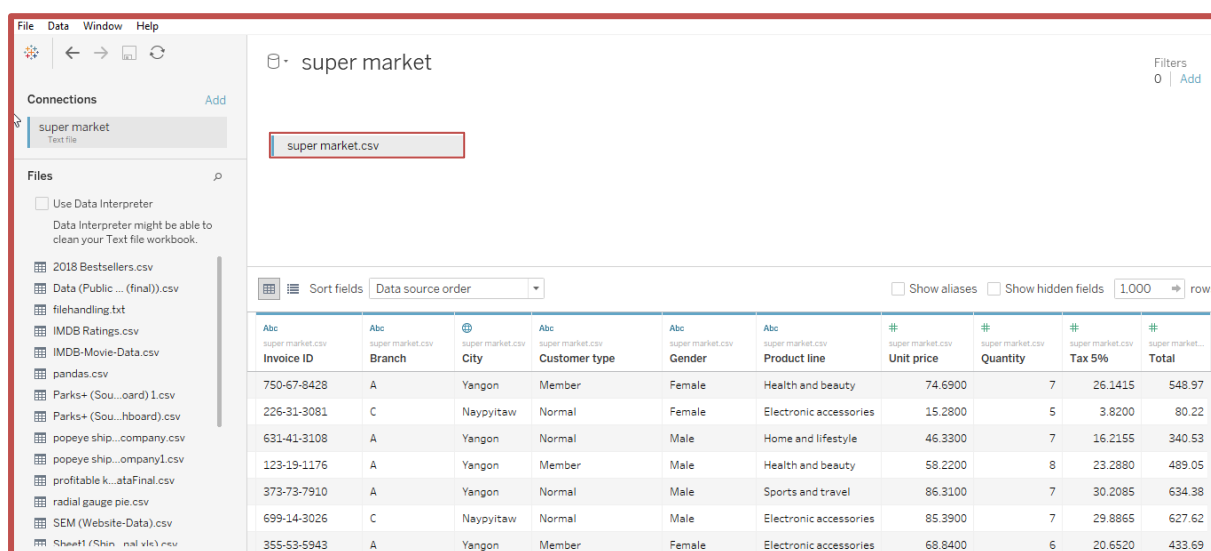

## Demo V - Solution

Use Marks card shelf and tool-tip to categorize and customize data respectively.

**Step 1:** Click on “Text File ” → Select “Super Market Sales” → Open

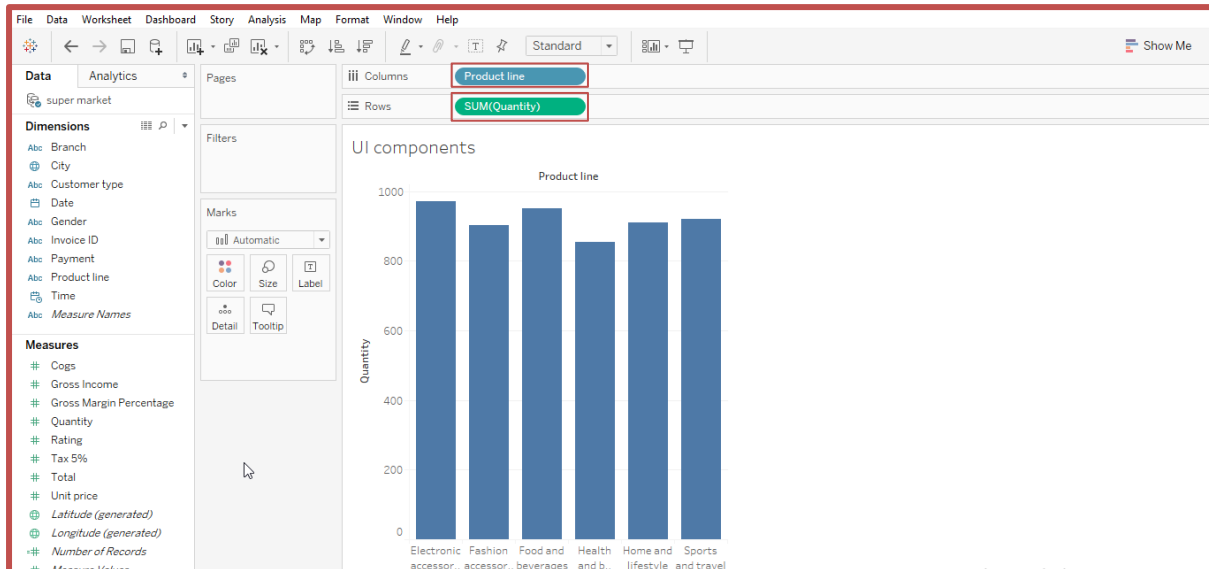

**Step 2:** Drag and drop the “Super Market Sales” sheet on the flow pane and click on sheet.

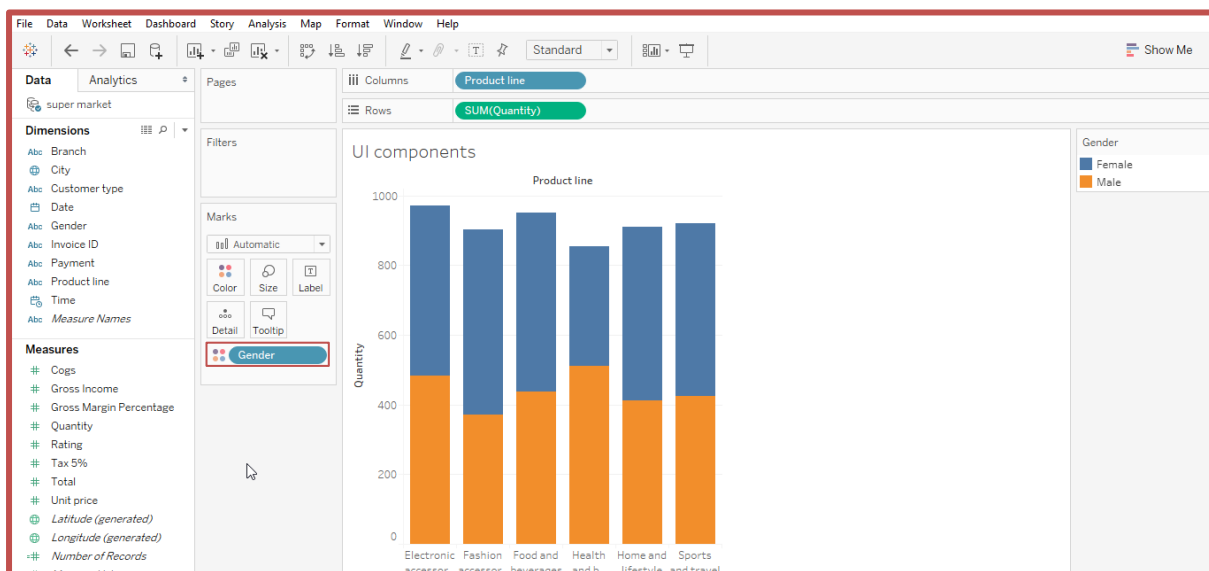

**Step 3:** Go to the Sheet and rename it to “UI components”.

**Step 4:** Drag and drop the required fields from dimensions and measures to column and row shelf respectively in the following manner.

1. Product line to column shelf.
2. Quantity to row shelf.

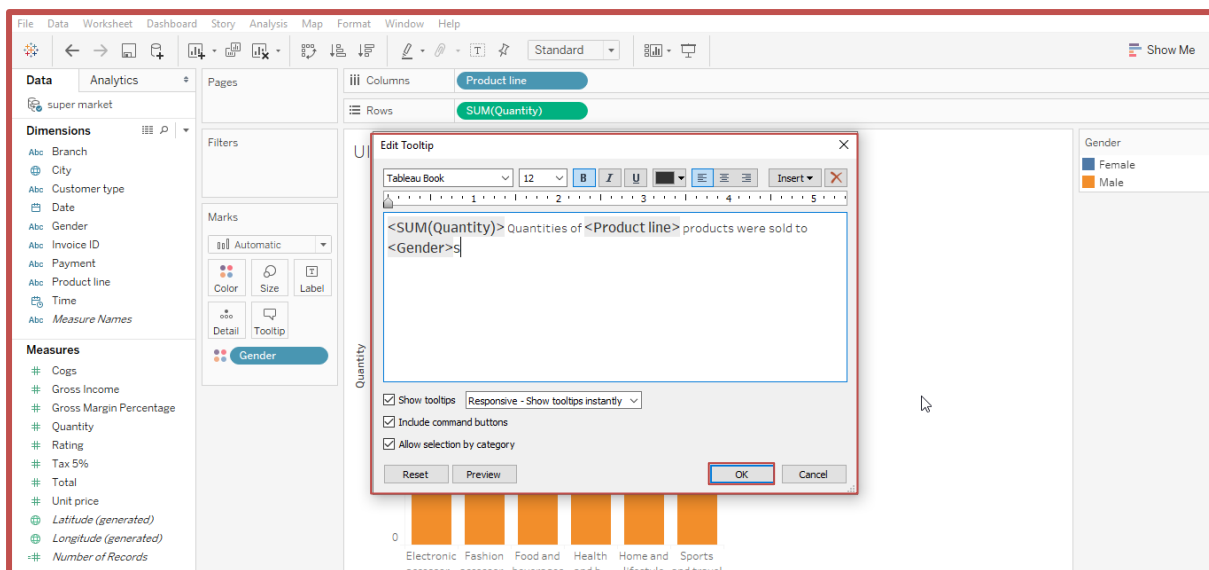

**Step 5:** To categorize it based on Gender, drop Gender to color shelf.

**Step 6:** Edit tooltip to customize the data.

## Module 2– Data Connection With Tableau Desktop

Now, we have a bar chart which represents the Quantities of Products sold based on Gender.
