Demo VII

To apply color gradient to line chart and enclose it in area chart.
Refer the dataset: African Mobile Data.xslx

Demo VII Solution

We shall consider African mobile data.

**Step 1:** Click on "Excel file" → Select "African mobile data" → Open

Step 2: Drag and drop the sheets that is "African mobile data" sheet on flow pane, select sales data and Click on sheet
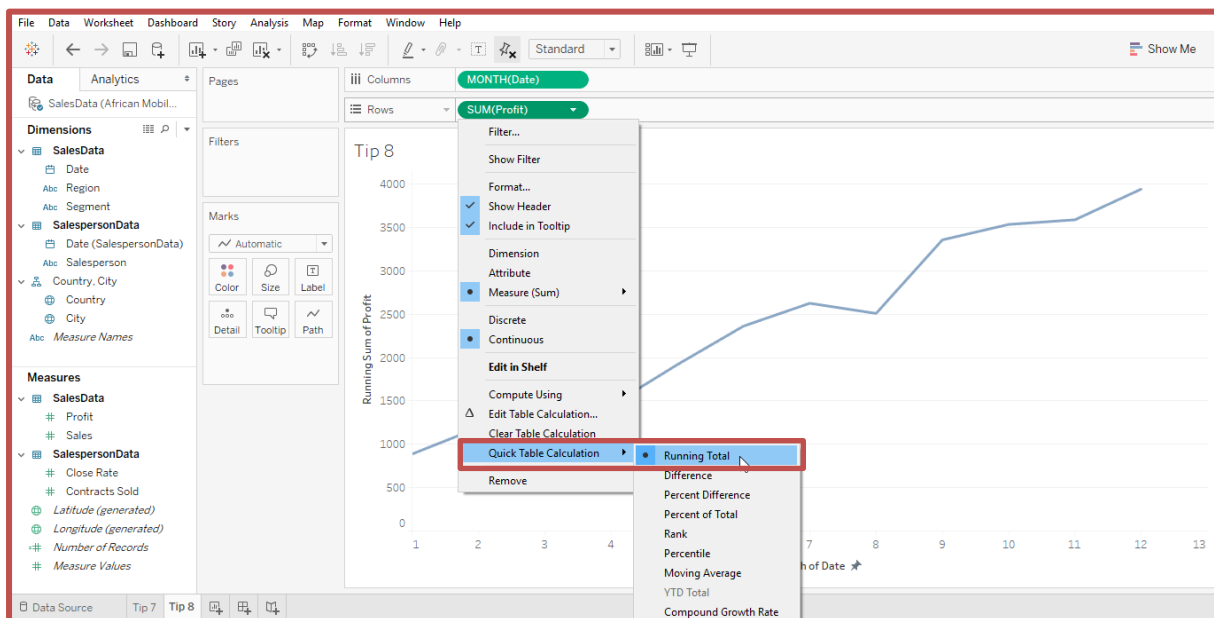

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.
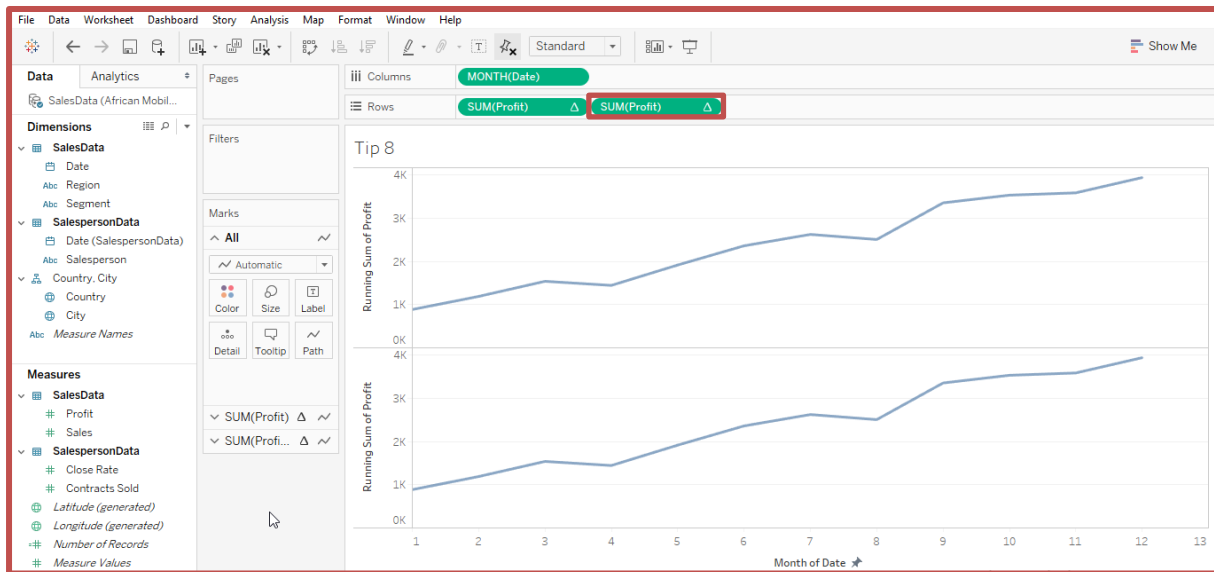

- ➢ Continuous Month (date) to columns
- ➢ Profit to rows

**Step 4:** Add running total to profit using quick table calculation.

**Step 5:** Duplicate the profit pane by ctrl+right click.

**Step 6:** Change the mark type to area of profit (first) from marks card shelf.

Step 7: Click the drop down of profit pane (second) and select dual axis.

Step 8: Edit colors of profit pane (first) to make it better.

Step 9: Add profit to colors pane in marks shelf.

We have the view which shows the color gradient to line chart by enclosing it in area chart.
