Module 10: Get Industry Ready
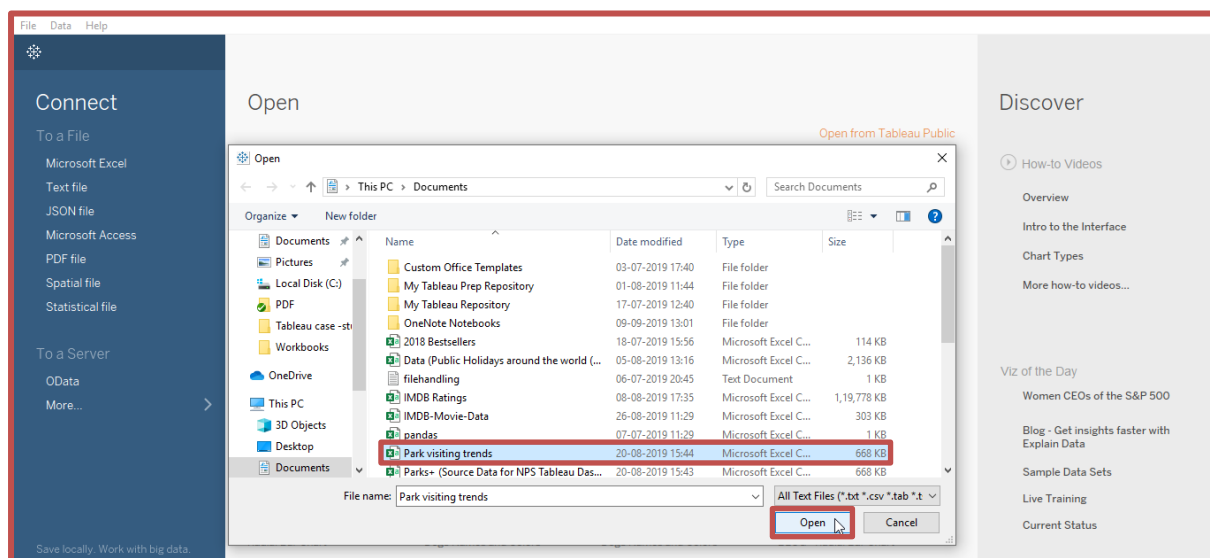

Demo Document II

edureka!

Demo II

Using "Park Visiting trend.csv" dataset, build a stacked bar chart and label it at the end of the bar.

Demo II Solution

We shall take up Park visiting trend data set in order visualize this.

**Step 1:** Click on "Text file" → Select "Park visiting trend" → Open

Step 2: Drag and drop the sheets that is "Park visiting trends" sheet on flow pane. Click on sheet.

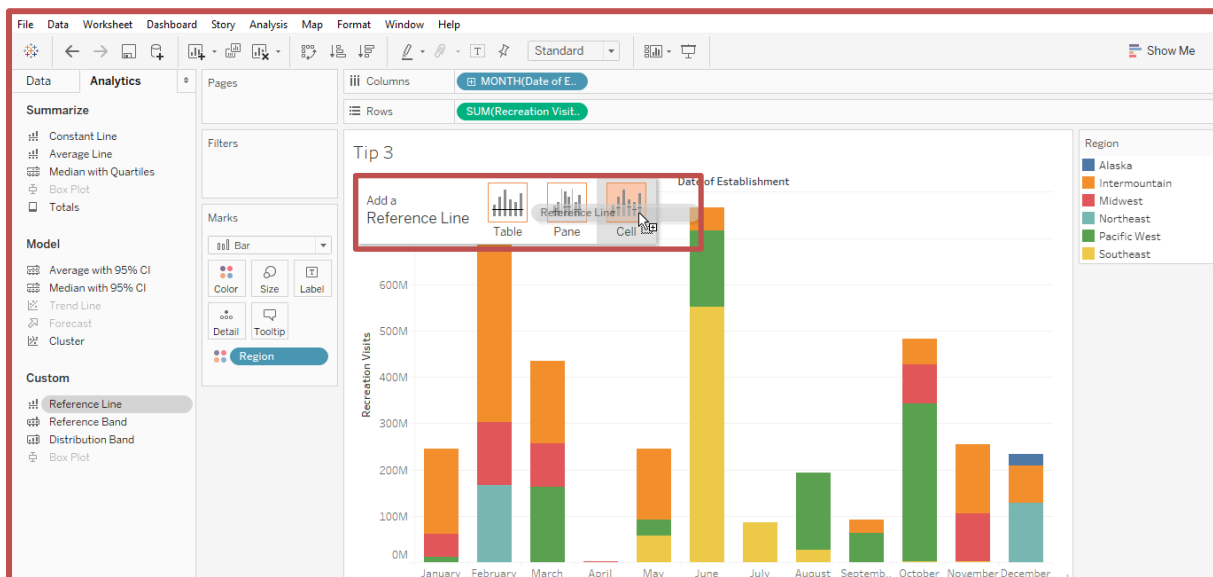

Go to sheet and rename the sheet to "Tip 3"

Step 3: Drag and drop the required fields from dimensions and measures to column and row shelf.
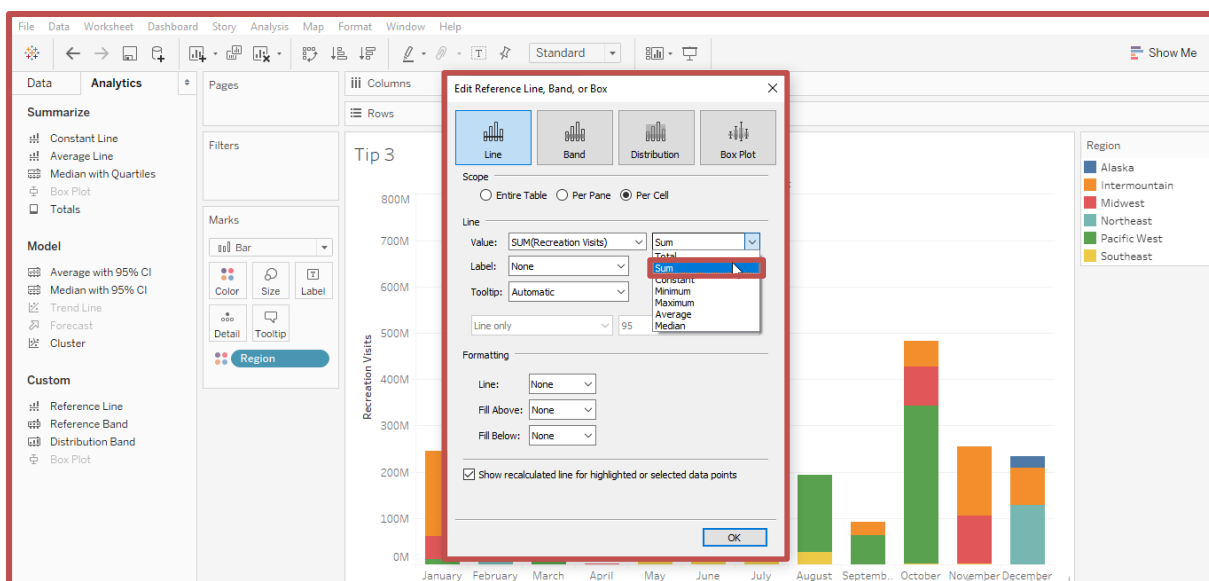

➢ Month (Date of establishment) to columns
➢ Recreational visits to rows
➢ Region to color

Step 4: Now, add reference line per cell from analytics pane.

Step 5: After the reference pane pops up change the value to sum .

Step 6: Change the label to value and click ok.

Now, we have stacked bar chart with label at the end of the bar.
