Module 10: Get Industry Ready
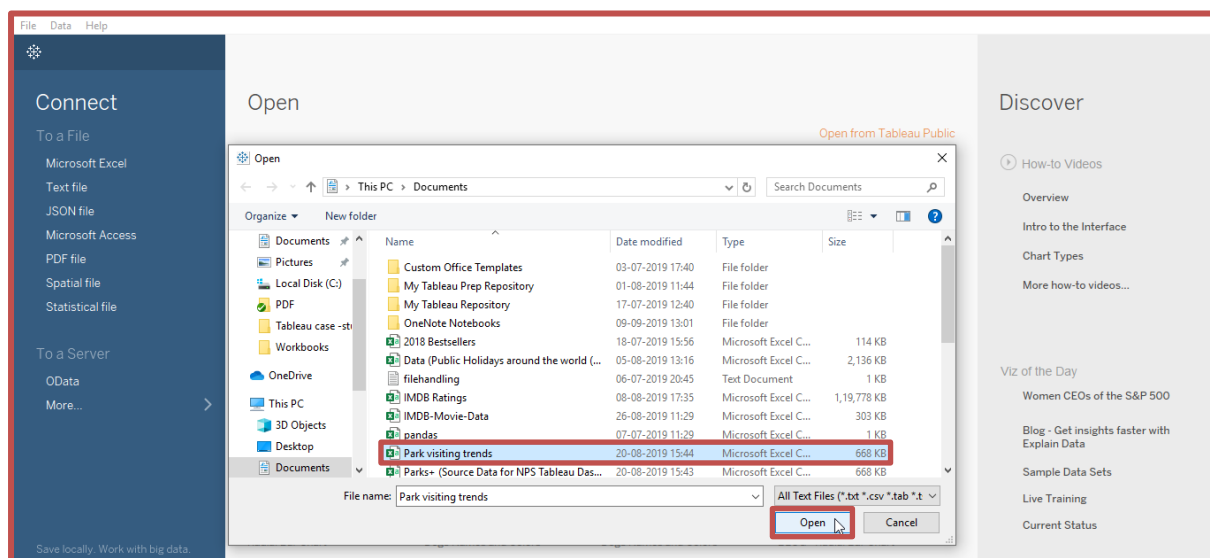

Demo Document III

edureka!

Demo III

Axis formatting i.e., to display your axis the chart.
Refer the dataset: Park visiting trend.csv

Demo III Solution

We shall take up Park visiting trend data set in order visualize this.

**Step 1:** Click on "Text file" → Select "Park visiting trend" → Open

Step 2: Drag and drop the sheets that is "Park visiting trends" sheet on flow pane. Click on sheet.

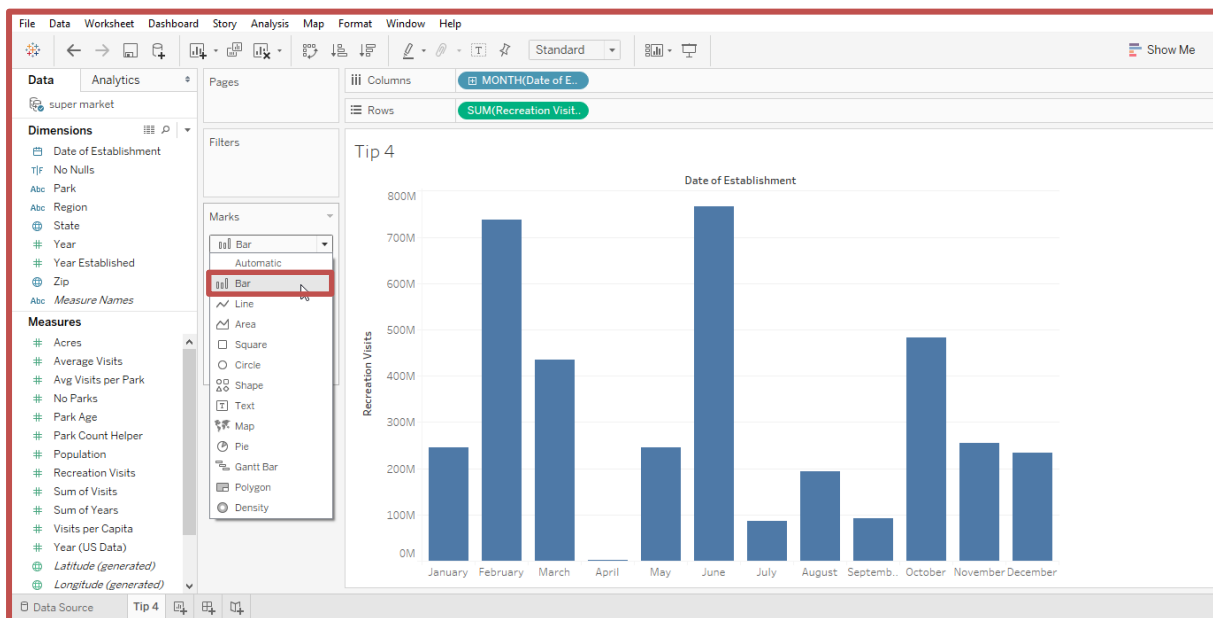

Go to sheet and rename the sheet to "Tip 4"

**Step 3:** Drag and drop the required fields from dimensions and measures to column and row shelf.

➢ Month (Date of establishment) to columns
➢ Recreational visits to rows

Step 4: Change the mark type to bar from marks card pane.

Step 5: Click the drop down of analysis pane and click on Table layout and select advance.

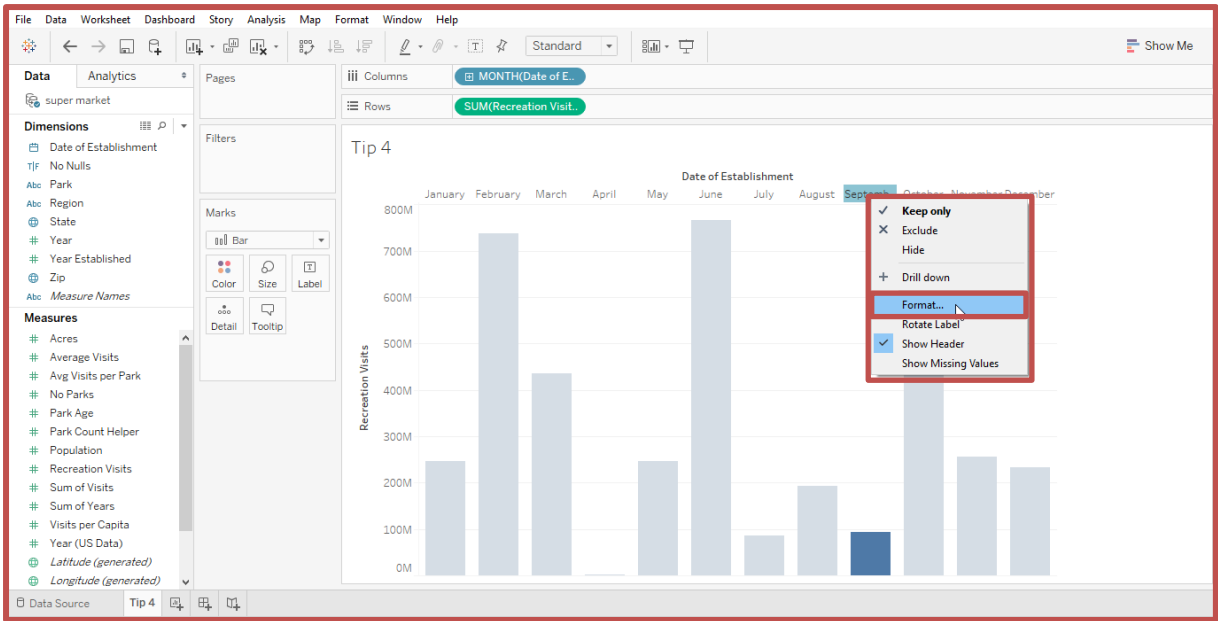

Step 6: Now, uncheck the box which says, show innermost level at bottom of view when there is vertical axis.

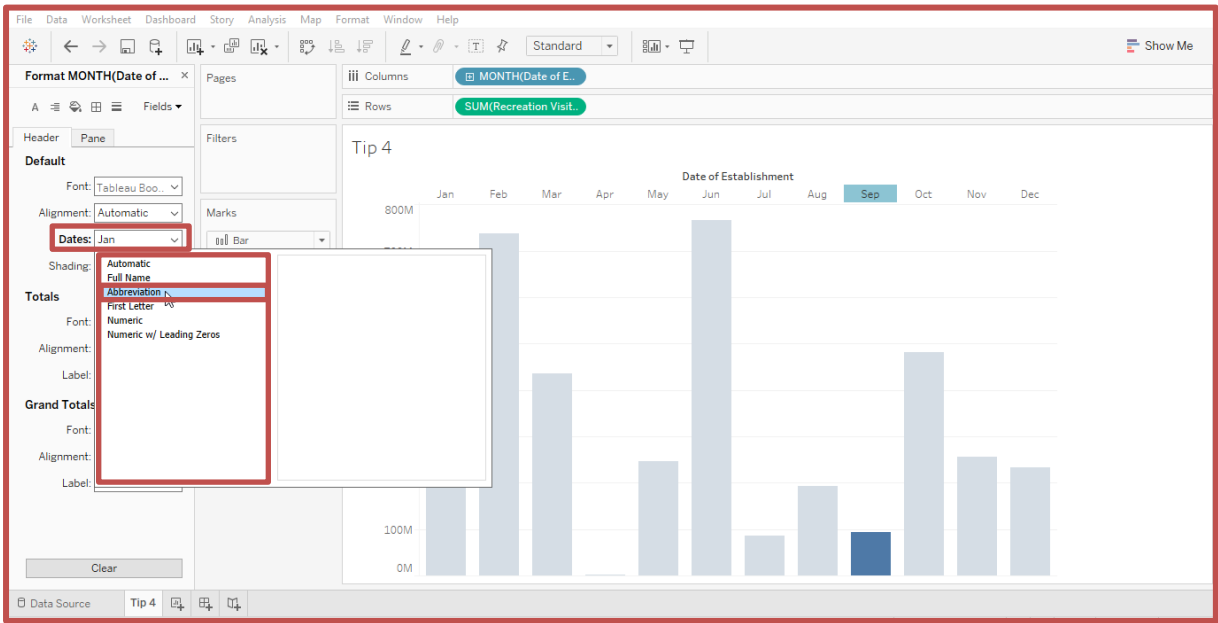

Format the axis to have a better view.

Step 7: To format right click on any of the month and select format.

Step 8: Format pane pops up, click the drop down of dates and select abbreviation.

Now you can have a better visualization with your axis above the chart.
